

CONDENCED UNAUDITED FINANCIAL STATEMENTS

FOR THE PERIOD ENDED 30 SEPTEMBER 2023

Statement Of Directors' Responsibilities In Relation To The Preparation Of The Financial Statements For the period ended 30 September 2023

In accordance with the provisions of Sections 334 and 335 of the Companies and Allied Matters Act (CAMA) 2020, Sections 24 and 28 of the Banks and Other Financial Institutions Act (BOFIA) 2020, and the Financial Reporting Council Act No. 6, 2011, the Directors are responsible for the preparation of financial statements which give a true and fair view of the state of affairs of the Bank, and of the financial performance for the period. The responsibilities include ensuring that:

(a) Appropriate internal controls are established both to safeguard the assets of the Bank and to prevent and detect fraud and other irregularities.

(b) The Bank keeps accounting records which disclose with reasonable accuracy the financial position of the Bank and which ensure that the financial statements comply with requirements of International Financial Reporting Standards and the Companies and Allied Matters Act (CAMA) 2020, Banks and Other Financial Institutions Act (BOFIA) 2020, the Financial Reporting Council Act No. 6, 2011, Revised Prudential Guidelines and relevant circulars issued by the Central Bank of Nigeria.

(c) The Bank has used appropriate accounting policies, consistently applied and supported by reasonable and prudent judgments and estimates, and that all applicable accounting standards have been followed; and

(d) It is appropriate for the financial statements to be prepared on a going concern basis unless it is presumed that the Bank will not continue in business.

The Directors accept responsibility for the financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates in conformity with International Financial Reporting Standards, the requirements of the Companies and Allied Matters Act, CAP C20 (CAMA) 2020, Banks and Other Financial Institutions Act (BOFIA) 2020, the Financial Reporting Council Act No. 6, 2011, Revised Prudential Guidelines, and relevant circulars issued by the Central Bank of Nigeria.

The Directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the Bank and its financial performance for the period under review

The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of the financial statements, as well as adequate systems of financial control.

Nothing has come to the attention of the Directors to indicate that the Bank will not remain a going concern for at least 90 days from the date of this statement.

Signed on behalf of the Directors by:

Date: October 2023

Statement Of Corporate Responsibility For The Preparation Of The Financial Statements For the period ended 30 September 2023

In line with the provision of S. 405 of CAMA 2020, the Chief Executive Officer and Chief Financial officer of Fidelity Bank Plc have reviewed the Financial Statement of the bank for the period ended September 30, 2023 and accept responsibility for the financial and other information within the report based on the following:

- The financial statements do not contain any untrue statement of material fact or omit to state a material fact, which would make the statement misleading.
- The financial statements and all other financial information included in the statements fairly present, in all material respects, the financial condition and result of operation of the bank as of and for the period ended September $30,\,2023$
- iii The bank's internal controls were evaluated within 90 days of the financial reporting date and are effective as of 30 September 2023
- The bank's internal Controls has been designed to ensure that all material information relating to the bank has been provided. iv

That we have disclosed to the bank's Auditors and the Audit Committee that there are no significant deficiencies in the design or operation of the bank's internal controls which could adversely affect the bank's ability to record, process, summaries and report financial data, and have discussed with the auditors any weaknesses in internal controls observed in the cause of the Audit; And that there is no fraud involving management or other employees which could have any significant role in the bank's internal control

There is no significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of this audit, including any corrective actions with regard to any observed deficiencies and material weaknesses

Signed on behalf of the Directors by:

ntegenes

The accompanying notes to the financial statements are an integral part of these financial statements.

Notes To The Financial Statements:

1. Corporate Information

These financial statements are for Fidelity Bank Plc (the "Bank"), a company incorporated in Nigeria on 19 November 1987. The registered office address of the Bank is at Fidelity Place, 1 Fidelity Bank Close Off Kofo Abayomi Street, Victoria-Island, Lagos, Nigeria.

The principal activity of the Bank is the provision of banking and other financial services to corporate and individual customers. Fidelity Bank Plc provides a full range of financial services including investment, commercial and retail banking.

2. Summary of accounting policies

2.1 Introduction to summary of account

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to the period presented, unless otherwise stated.

2.1.1 Basis of Preparation

The Bank's financial statements for the period ended 30 September 2023 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and in the manner required by the Companies and Allied Matters Act of Nigeria , the Financial Reporting Council Act of Nigeria , Banks and Other Financial Institutions Act of Nigeria and relevant Central Bank of Nigeria Circulars, and should be read in conjunction with the Bank's annual financial statements as at 31 December 2022.

Additional information required by national regulations is included where appropriate.

The financial statements comprise the statement of profit or loss and other comprehensive income, the statement of financial position, the statement of changes in equity, statement of cashflows, significant accounting policies and the notes to the financial statements.

The financial statements have been prepared in accordance with the going concern principle under the historical cost convention, except for financial assets and financial liabilities measured at fair value.

The financial statements are presented in Naira, which is the Bank's presentation currency. The figures shown in the financial statements are stated in Naira millions.

2.1.2 Changes in accounting policies and disclosures

New and amended standards and interpretations.

The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the preparation of the Bank's annual financial statements for the period ended 30 September 2023, except for the adoption of new standards effective as of 1 January 2022. The Bank has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Notes To The Financial Statements:

a IFRS 16 - Leases

The amendment removes the illustration of the reimbursement of leasehold improvements.

b IFRS 9 Financial Instruments

The amendment clarifies that in applying the '10 per cent' test to assess whether to derecognise a financial liability, an entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf.

c IAS 41 Agriculture

The amendment removes the requirement in IAS 41 for entities to exclude cash flows for taxation when measuring fair value. This aligns the fair value measurement in IAS 41 with the requirements of IFRS 13 Fair Value Measurement to use internally consistent cash flows and discount rates and enables preparers to determine whether to use pre-tax or post-tax cash flows and discount rates for the most appropriate fair value measurement.

d IFRS 1 First-time Adoption of International Financial Reporting Standards

The amendment provides additional relief to a subsidiary which becomes a first-time adopter later than its parent in respect of accounting for cumulative translation differences. As a result of the amendment, a subsidiary that uses the exemption in IFRS 1:D16(a) can now also elect to measure cumulative translation differences for all foreign operations at the carrying amount that would be included in the parent's consolidated financial statements, based on the parent's date of transition to IFRS Accounting Standards, if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary. A similar election is available to an associate or joint venture that uses the exemption in IFRS 1:D16(a).

2.2 Income Taxation

The tax expense for the period comprises current and deferred tax. Tax is recognised in arriving at profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

i Current Income Tax

The current income tax charge is calculated on the basis of the applicable tax laws enacted or substantively enacted at the reporting date in the respective jurisdiction.

Notes To The Financial Statements:

ii Deferred Income Tax

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising from investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Bank and it is probable that the difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxables entities where there is an intention to settle the balance on a net basis.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised and reviewed at each reporting date, reduced to the extent that it is no longer probable that the related tax benefit will be realised. The Bank has applied caution by not recognising additional deferred tax assets which is not considered capable of recovery.

• IAS 12 - Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The amendments to IAS 12 Income Taxes require companies to recognise deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences. They will typically apply to transactions such as leases of lessees and decommissioning obligations and will require the recognition of additional deferred tax assets and liabilities. The amendment should be applied to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, entities should recognise deferred tax assets (to the extent that it is probable that they can be utilised) and deferred tax liabilities at the beginning of the earliest comparative period for all deductible and taxable temporary differences associated with:

- right-of-use assets and lease liabilities, and
- decommissioning, restoration and similar liabilities, and the corresponding amounts recognised as part of the cost of the related assets. The cumulative effect of recognising these adjustments is recognised in retained earnings, or another component of equity, as appropriate. IAS 12 did not previously address how to account for the tax effects of on-balance sheet leases and similar transactions and various approaches were considered acceptable.

The effective date is 1 January 2023 . These amendments did not have any impact on the financial statements of the Bank in the period ,

Notes To The Financial Statements:

2.3 Accounting judgements, estimates and assumptions

The preparation of the Bank's financial statements requires management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and the accompanying disclosures, as well as the disclosure of contingent liability about these assumptions and estimates that could result in outcome that requires a material adjustment to the carrying amount of assets and liabilities affected in future periods.

Management discusses with the Audit Committee the development, selection and disclosure of the Bank's critical accounting policies and estimates, and the application of these policies and estimates.

Estimates and Assumptions:

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are described below. The Bank based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

Going Concern

The huge amount of stimulus deployed by various countries to ease the downsides of the COVID-19 pandemic, particularly in 2021, predisposed the global economy to huge debt levels, considering the rapid growth and increase in global private and public debt portfolios.

Business continues to function well and largely uninterrupted. The Bank continues to provide access to vital materials for modern life which it has proven to be doing responsibly and efficiently in challenging circumstances.

Uncertainties remains with doubts about reasonably estimation of the future impact. However, the financial situation of the Bank remains healthy and it does not believe that the impact of the Covid-19 pandemic will have any material adverse effect on our financial condition or liquidity. Therefore, based on the Bank's liquidility and expected yearly cash outflow, the Bank expects that it will be able to meet its financial obligations and therefore continues to adopt a going concern assumption as the basis for preparing its financial statements.

2.3 Accounting Judgements, Estimates and Assumptions -

Depreciation and Carrying Value Of Property, Plant and

The estimation of the useful lives of assets is based on management's judgement. Any material adjustment to the estimated useful lives of items of property and equipment will have an impact on the

Allowances for credit losses

Measurement of the expected credit loss allowance

The measurement of the expected credit loss allowance for financial assets measured at amortised cost and FVOCI is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is further detailed in Note 3, which also sets out key sensitivities of the ECL to changes in these elements.

Notes To The Financial Statements:

A number of Significant judgements are also required in applying the accounting requirements for

- · Determining criteria for significant increase in credit risk;
- · Choosing appropriate models and assumptions for the measurement of ECL;
- · Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated
- · Establishing groups of similar financial assets for the purposes of measuring ECL.

The uncertainties caused by Covid-19, and the volatility in macro economic variables required the Bank to update the inputs and assumptions used for the determination of expected credit losses ("ECLs") as at 31 December 2022. No futher update was done in the current period.

Determination of Collateral Value

Management monitors market value of collateral on a regular basis. Management uses its experienced judgement on independent opinion to adjust the fair value to reflect the current circumstances. The amount and collateral required depend on the assessment of credit risk of the counterpart.

In determining the collateral value, the Bank has considered potential impacts of the current economic volatility as a result of Covid-19 variations and the impact of Russian/Ukrain war.

The Directors believe that the underlying assumptions are appropriate and that the Bank's financial statements therefore present the financial position and results fairly. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in the notes.

Fair Value Measurement of Financial Instruments

When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be measured based on quoted prices in active markets, their fair values are measured using valuation techniques including the discounted cash flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility changes in assumptions about these factors could affect the reported fair value of financial instruments. See Note 3.5 for further disclosures.

The Bank has considered potential impacts of the current economic volatility in determination of the reported fair value of the financial instruments and these are considered to represent management's best assessment based on observable information. Markets , however , remain volatile and the recorded amounts remain sensitive to market fluctuations.

2.3.1 Standards Issued But Not Yet Effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's financial statements are disclosed below. The Bank intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

Notes To The Financial Statements:

IFRS 17 Insurance Contracts

In May 2017, the IASB issued IFRS 17 Insurance Contracts (IFRS 17), a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, IFRS 17 will replace IFRS 4 Insurance Contracts (IFRS 4) that was issued in 2005. IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and reinsurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. The overall objective of IFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in IFRS 4, which are largely based on grandfathering previous local accounting policies, IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of IFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

The main features of the new accounting model for insurance contracts are as follows:

- The effect of changes in discount rates will be reported in either profit or loss or other comprehensive income, determined by an accounting policy choice.
- The presentation of insurance revenue and insurance service expenses in the statement of comprehensive income based on the concept of services provided during the period under review.
- Amounts that are paid to a policyholder in all circumstances, regardless of whether an insured event happens (non-distinct investment components) are not presented in the income statement, but are recognised directly on the balance sheet.
- Insurance services results (earned revenue less incurred claims) are presented separately from the insurance finance income or expense
- Extensive disclosures to provide information on the recognised amounts from insurance contracts and the nature and extent of risks arising from these contracts

IFRS 17 is effective for reporting periods beginning on or after 1 January 2023, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17.

IFRS 17 will have no impact on the Bank, as it does not issue insurance contract.

2.3.2 IBOR Transition

Interbank Offered Rates (IBORs) are average rates at which certain banks (Contributor Panel bank) could borrow in the interbank market. The rate range in tenors from overnight to 12 months and includes a spread reflecting the credit risk involved in lending money to banks. These rates have been a major benchmark for financial transactions since the 1980s. As at 2018, USD LIBOR and EURIBOR (types of IBOR) together represent 80% of IBOR referenced transactions (Bloomberg, 2018) worth approximately \$400 trillion (The World Bank, 2021). Examples of such transactions using LIBOR as reference rates are Loans, Deposits, Bonds, Adjustable-rate Mortgages, Over-the-counter Derivatives, Securitised products, Credit Cards, and more.

There are three major administrators of these interest reference rates- Euro Interbank Offered Rate (EURIBOR), London Interbank Offered Rate (LIBOR), and Tokyo Interbank Offered Rate (TIBOR). IBORs are published in different currencies/pairs namely, GBP LIBOR, USD LIBOR, EURIBOR/EURO LIBOR, CHF LIBOR, JPY LIBOR, JPY TIBOR, EUROYENTIBOR, and for overnight (O/N), 1week, 1month, 2months, 3months, 6months, and 12months tenors. Globally,

| IBORs | GPB | USD LIBOR | EURIBOR | CHF LIBOR | JPY LIBOR, |
|-------|-------|-----------|---------|-----------|------------|
| | LIBOR | | , Euro | | JPY TIBOR, |

Notes To The Financial Statements:

| ARRs | Reformed | Secured | Euro Short- | Swiss Average | Tokyo Overnight |
|------|-----------|-------------|-------------|----------------|-----------------|
| | Sterling | Overnight | term Rate | Rate Overnight | Average Rate |
| | Overnight | Financing | (ESTER) | (SARON) | (TONIA) |
| | Index | Rate (SOFR) | | | |
| | Average | | | | |
| | (SONIA) | | | | |

Key Timelines

In March 2021, the ICE Benchmark Administration (IBA), the administrator of LIBOR, announced the following cessation dates for USD, GBP, JPY, CHF, and EUR LIBOR.

- All tenors across CHF, and EUR LIBOR, as well as 1week and 2 months USD LIBOR ceased from December 31, 2021.
- Overnight, 1 week, 2 months, 12 months GBP, and JPY LIBOR have ceased to be published from December 31, 2021.
- Overnight, 1M, 3M, 6M & 12M tenors for USD LIBOR will cease June 30, 2023. (The Intercontinental Exchange, 2021)

The effect:

All new contracts entered will either utilize a reference rate other than IBOR or have robust fallback language that includes a clearly defined ARR (Alternative Reference Rates) after IBOR's discontinuation by June 2023 (for USD LIBOR Tenors other than I week and 2 months).

For existing contracts that are indexed to an IBOR and mature after the expected cessation of the IBOR rate, the fidelity team has established policies to transition the affected contracts.

Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 - Interest Rate Benchmark Reform – On 27 August 2020, the IASB published Interest Rate Benchmark Reform – Phase 2, Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16. With publication of the phase two amendments, the IASB has completed its work in response to IBOR reform.

Practical Expedient for changes in the basis for determining the contractual cash flows as a result of

The amendments include a practical expedient to require contractual changes, or changes to cash flows that are directly required by the reform, to be treated as changes to a floating interest rate, equivalent to a movement in a market rate of interest. Inherent in allowing the use of this practical expedient is the requirement that the transition from an IBOR benchmark rate to a RFR takes place on an economically equivalent basis with no value transfer having occurred.

Any other changes made at the same time, such as a change in the credit spread or maturity date, are assessed. If they are substantial, the instrument is derecognised. If they are not substantial, the updated effective interest rate (EIR) is used to recalculate the carrying amount of the financial instrument, with any modification gain or loss recognised in profit or loss.

The practical expedient is required for entities applying IFRS 4 that are using the exemption from IFRS 9 (and, therefore, apply IAS 39) and for IFRS 16 Leases, to lease modifications required by IBOR reform.

Notes To The Financial Statements:

Relief from discontinuing hedging relationships

The amendments permit changes required by IBOR reform to be made to hedge designations and hedge documentation without the hedging relationship being discontinued. Permitted changes include redefining the hedged risk to reference an RFR and redefining the description of the hedging instruments and/or the hedged items to reflect the RFR. Entities are allowed until the end of the reporting period, during which a modification required by IBOR reform is made, to complete the changes.

Any gain or loss that could arise on transition is dealt with through the normal requirements of IFRS 9 and IAS 39 to measure and recognise hedge ineffectiveness. Amounts accumulated in the cash flow hedge reserve are deemed to be based on the RFR. The cash flow hedge reserve is released to profit or loss in the same period or periods in which the hedged cash flows based on the RFR affect profit or loss

Relief from discontinuing hedging relationships continued

For the IAS 39 assessment of retrospective hedge effectiveness, on transition to an RFR, entities may elect on a hedge-by-hedge basis, to reset the cumulative fair value changes to zero. This relief applies when the exception to the retrospective assessment ends.

The amendments provide relief for items within a designated group of items (such as those forming part of a macro cash flow hedging strategy) that are amended for modifications directly required by IBOR reform. The reliefs allow the hedging strategy to remain and not be discontinued. As items within the hedged group transition at different times from IBORs to RFRs, they will be transferred to sub-groups of instruments that reference RFRs as the hedged risk.

As instruments transition to RFRs, a hedging relationship may need to be modified more than once. The phase two reliefs apply each time a hedging relationship is modified as a direct result of IBOR reform. The phase two reliefs cease to apply once all changes have been made to financial instruments and hedging relationships, as required by IBOR reform.

Separately Identifiable Risk Components

The amendments provide temporary relief to entities from having to meet the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component. The relief allows entities upon designation of the hedge, to assume that the separately identifiable requirement is met, provided the entity reasonably expects the RFR risk component to become separately identifiable within the next 18 months..

Additional Disclosures :- Fidelity IBOR transition.

IFRS 7 lingering impact of the Disclosures include the following:

- How the entity is managing the transition to RFRs, its progress and the risks to which it is exposed arising from financial instruments due to IBOR reform.
- Disaggregated by each significant IBOR benchmark, quantitative information about financial instruments that have yet to transition to RFRs.
- If IBOR reform has given rise to changes in the entity's risk management strategy,

Notes To The Financial Statements:

Fidelity Bank worked with leading experts to assess the impact of IBOR transition on products and financial instruments based on exposure, maturity profile, and product features, as well as the impact on legal contracts to determine the potential need for base rate and fallback language amendment, re-pricing, re-papering, and client outreach.

Fidelity Bank also worked with various stakeholders and improving processes, policies, and systems that may be affected by the transition. This is done to ensure that the transition's impact is fully addressed. The Bank also developed a robust communication plan to engage with customers and ensure they understand this transition and its significance to them. Client relationship managers are also prepared to further support customers on inquiries regarding the LIBOR transition.

Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its As

The amendments address the conflict between IFRS 10 and IAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in IFRS 3, between an investor and its associate or joint venture, is recognised in full. Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is recognised only to the extent of unrelated investors' interests in the associate or joint venture. The IASB has deferred the effective date of these amendments indefinitely, but an entity that early adopts the amendments must apply them prospectively. These amendments will currently have no impact on the financial statements of the Bank.

Amendments to IAS 1 - Classification of Liabilities as Current or Non-current

In January 2020, the Board issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is in itself an equity instrument, would the terms of a liability not impact its classification

Right to Defer Settlement

The Board decided that if an entity's right to defer settlement of a liability is subject to the entity complying with specified conditions, the entity has a right to defer settlement of the liability at the end of the reporting period if it complies with those conditions at that date.

Existence at the end of the reporting period

The amendments also clarify that the requirement for the right to exist at the end of the reporting period applies regardless of whether the lender tests for compliance at that date or at a later date.

Management Expectations

IAS 1.75A has been added to clarify that the 'classification of a liability is unaffected by the likelihood that the entity will exercise its right to defer settlement of the liability for at least twelve months after the reporting period'. That is, management's intention to settle in the short run does not impact the classification. This applies even if settlement has occurred when the financial statements are authorised

Notes To The Financial Statements:

Amendments to IAS 1 - Classification of Liabilities as Current or Non-current continued Meaning of the term 'Settlement'

The Board added two new paragraphs (paragraphs 76A and 76B) to IAS 1 to clarify what is meant by 'settlement' of a liability. The Board concluded that it was important to link the settlement of the liability with the outflow of resources of the entity.

Settlement by way of an entity's own equity instruments is considered settlement for the purpose of classification of liabilities as current or non-current, with one exception.

In cases where a conversion option is classified as a liability or part of a liability, the transfer of equity instruments would constitute settlement of the liability for the purpose of classifying it as current or non-current. Only if the conversion option itself is classified as an equity instrument would settlement by way of own equity instruments be disregarded when determining whether the liability is current or

Unchanged from the current standard, a rollover of a borrowing is considered the extension of an existing liability and is therefore not considered to represent 'settlement'.

The Bank will assess and apply this amendment (where applicable) when it becomes effective on 1 January 2023.

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

The IASB amended IAS 1 to require entities to disclose their material rather than their significant accounting policies. The amendments define what is 'material accounting policy information' and explain how to identify when accounting policy information is material. They further clarify that immaterial accounting policy information does not need to be disclosed. If it is disclosed, it should not obscure material accounting information. To support this amendment, the IASB also amended;

IFRS Practice Statement 2 Making Materiality Judgements to provide guidance on how to apply the concept of materiality to accounting policy disclosures.

The Bank will apply this amendment (where applicable) when it becomes effective on 1 January 2023.

Amendments to IFRS 3 - Reference to the Conceptual Framework

In May 2020, the IASB issued Amendments to IFRS 3 Business Combinations - Reference to the Conceptual Framework. The amendments are intended to replace a reference to a previous version of the IASB's Conceptual Framework (the 1989 Framework) with a reference to the current version issued in March 2018 (the Conceptual Framework) without significantly changing its requirements.

The amendments add an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of IAS 37 Provisions, Contingent Liabilities and Contingent Assets or IFRIC 21 Levies, if incurred separately. The exception requires entities to apply the criteria in IAS 37 or IFRIC 21, respectively, instead of the Conceptual Framework, to determine whether a present obligation exists at the acquisition date.

At the same time, the amendments add a new paragraph to IFRS 3 to clarify that contingent assets do not qualify for recognition at the acquisition date.

These amendments did not have any impact on the financial statements of the Bank in the period,

Amendments to IAS 16 - Property, Plant and Equipment: Proceeds before Intended Use

The amendment prohibits entities from deducting from the cost of an item of property, plant and equipment (PP&E), any proceed of the sale of items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the costs of producing those items in profit or local.

These amendments did not have any impact on the financial statements of the Bank in the period.

Notes To The Financial Statements:

Amendments to IAS 37 - Onerous Contracts - Costs of Fulfilling a Contract

In May 2020, the IASB issued amendments to IAS 37 Provisions, Contingent Liabilities and Contingent Assets to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.

The amendments apply a 'directly related cost approach'. The costs that relate directly to a contract to provide goods or services include both incremental costs (e.g., the costs of direct labour and materials) and an allocation of costs directly related to contract activities (e.g., depreciation of equipment used to fulfil the contract as well as costs of contract management and supervision). General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

These amendments have no impact on the financial statements of the Bank, and it became effective in the reporting period beginning on 1 January 2022.

Annual Improvements 2018-2020 cycle (issued in May 2020)

IFRS 1 First-time Adoption of International Financial Reporting Standards - Subsidiary as a first-

• The amendment permits a subsidiary that elects to apply paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by the parent, based on the parent's date of transition to IFRS. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of IFRS 1.

These amendments have no impact on the financial statements of the Bank, and it became effective in the reporting period beginning on 1 January 2022.

IFRS 9 Financial Instruments - Fees in the '10 per cent' test for derecognition of financial liabilitie

- The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. There is no similar amendment
- An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.
- An entity applies the amendment for annual reporting periods beginning on or after 1 January 2022. These amendments currently have no impact on the financial statements of the Bank.

IFRS 16 Leases Illustrative Example accompanying - Lease incentives

The amendment removes the illustration of payments from the lessor relating to leasehold improvements in Illustrative Example 13 accompanying IFRS 16. This removes potential confusion regarding the treatment of lease incentives when applying IFRS 16.

IAS 41 Agriculture - Taxation in fair value measurements

- The amendment removes the requirement in paragraph 22 of IAS 41 that entities exclude cash flows for taxation when measuring the fair value of assets within the scope of IAS 41.
- An entity applies the amendment to fair value measurements on or after the beginning of the first annual reporting period beginning on or after 1 January 2022. Earlier application is permitted.

Notes To The Financial Statements:

These amendments will currently have no impact on the financial statements of the Bank.

• IAS 23 Borrowing Costs

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete. An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after 1 January 2019, with early application permitted. Since the Bank's current practice is in line with these amendments, the Bank does not expect any effect on its financial statements.

2.3.3 Foreign currency translation and transaction

(a) Functional and presentation currency

Items included in the financial statements of the Bank are measured using the currency of the primary economic environment in which the entity operates ("the functional currency").

The financial statements are presented in Naira, which is the Bank's presentation currency.

(b) Transactions and balances

Foreign currency transactions (i.e. transactions denominated, or that require settlement, in a currency other than the functional currency) are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured.

Monetary items denominated in foreign currency are translated with the closing rate as at the reporting date. Non-monetary items measured at historical cost denominated in a foreign currency are translated with the exchange rate as at the date of initial recognition; non-monetary items in a foreign currency that are measured at fair value are translated using the exchange rates at the date when the fair value was determined. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

In the case of changes in the fair value of monetary assets denominated in foreign currency classified as fair value through other comprehensive income (FVOCI), a distinction is made between translation differences resulting from changes in amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortised cost are recognised in profit or loss, and other changes in the carrying amount, except impairment, are recognised in other comprehensive income.

Translation differences on non-monetary financial instruments, such as equities held at fair value through profit or loss, are reported as part of the fair value gain or loss. Translation differences on non-monetary financial instruments, such as equities classified as FVOCI financial assets, are included in other comprehensive income.

Notes To The Financial Statements:

2.4 Financial assets and liabilities (Policy applicable for financial instruments)

2.4.1 Initial recognition

The Bank initially recognises loans and advances, deposits and debt securities issued on the date on which they are originated. All other financial instruments (including regular-way purchases and sales of financial assets) are recognised on the trade date, which is the date on which the Bank becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is measured initially at fair value plus, (for an item not at fair value through profit or loss), transaction costs that are directly attributable to its acquisition or issue. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Day 1 profit or loss

When the transaction price of the instrument differs from the fair value at origination and the fair value is based on a valuation technique using only inputs observable in market transactions, the Bank recognises the difference between the transaction price and fair value in Net gains/(losses) from financial instruments. In those cases where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognised in profit or loss when the inputs become observable, or when the instrument is derecognised.

Amortised cost and gross carrying amount

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

Effective interest method

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortised cost before any impairment allowance) or to the amortised cost of a financial liability. The calculation does not consider expected credit losses and includes transaction costs, premiums or discounts and fees and points paid or received that are integral to the effective interest rate, such as origination fees.

For purchased or originated credit-impaired ('POCI') financial assets — assets that are credit-impaired at initial recognition — the Bank calculates the credit-adjusted effective interest rate, which is calculated based on the amortised cost of the financial asset instead of its gross carrying amount and incorporates the impact of expected credit losses in estimated future cash flows.

When the Bank revises the estimates of future cash flows, the carrying amount of the respective financial assets or financial liability is adjusted to reflect the new estimate discounted using the original effective interest rate. Any changes are recognised in profit or loss.

Notes To The Financial Statements:

Interest income

Interest income and expenses are recognised in profit or loss using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

When calculating the effective interest rate for financial instruments other than credit-impaired financial assets, the Bank estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental

2.4.2 Financial Assets - Subsequent Measurement

a) Debt Instruments

The classification and subsequent measurement of debt instruments depend on the Bank's business model for managing the financial assets and the contractual terms of the cash flows. Based on these factors, the Bank classifies its debt instruments into one of the following measurement categories:

Amortised Cost: Financial assets that are held within a business model whose objective is collection of contractual cash flows and where such cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss due to impairment or upon derecognition of a debt investment that is subsequently measured at amortised cost is recognised in profit or loss. Interest income from these financial assets is included in "Interest and similar income" using the effective interest rate method.

Fair value through other comprehensive income (FVOCI): Financial assets that are held within a business model whose objective is achieved both by collection of contractual cash flows and by selling the assets, where those cash flows represent solely payments of principal and interest, and are not designated at fair value through profit or loss, are measured at fair value through other comprehensive income. Movements in the carrying amount are taken through OCI, except for recognition of impairment gains and losses, interest revenue and foreign exchange gains and losses on the instrument's amortised cost which are recognised in profit or loss.

When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in "Other operating income". Interest income from these financial assets is included in "Interest and similar income" using the effective interest rate method.

Fair value through profit or loss (FVTPL): Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss is recognised in profit or loss and presented in the profit or loss statement within "Net gains/(losses) from financial instruments classified as held for trading" in the period in which it arises. Interest income from these financial assets is included in "Interest and similar income".

Notes To The Financial Statements:

Business Model Assessment

The Bank makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Bank's management;

Business Model Assessment - continued

- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected.
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Bank's stated objective for managing financial assets is achieved and how cash flows are realized.

Solely Payments of Principal and Interest (SPPI) Assessment

Principal is defined as the fair value of the financial asset on initial recognition. Interest is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Bank considers:

- contingent events that would change the amount and timing of cash flows;
- · leverage features;
- prepayment and extension terms;
- terms that limit the Bank's claim to cash flows from specified assets (e.g. non-recourse asset arrangements); and
- features that modify consideration of the time value of money e.g. periodical rate of interest

Notes To The Financial Statements:

Reclassifications

The Bank reclassifies debt investments when and only when its business model for managing those assets changes.

Modifications

If the terms of a financial asset are modified, the Bank evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and a new financial asset is recognised at fair value.

If the cash flows of the modified asset carried at amortised cost are not substantially different, then the modification does not result in derecognition of the financial asset. In this case, the Bank recalculates the gross carrying amount of the financial asset and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in profit or loss.

If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses.

b) Equity Instruments

The Bank subsequently measures all Quoted and Unquoted equity investments at fair value through other comprehensive income. Where the Bank has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments continue to be recognised in profit or loss as other income when the right to receive payments is established. These investments are held for strategic purposes rather than for trading purposes.

c) Derivative Financial Instruments

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value.

The Bank uses widely recognised valuation models for determining the fair value of common and simple financial instruments, such as interest rate and currency swaps that use only observable market data and require little management judgement and estimation. Observable prices or model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives and simple OTC derivatives such as interest rate swaps. Availability of observable market prices and model inputs reduces the need for management judgement and estimation and also reduces the uncertainty associated with determining fair values. Availability of observable markets prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

d) Non-derivative financial assets

The Bank has revised its internal treasury and risk management systems to support the transition to SOFR. During the course of this transition, the Bank's IBOR Transition team established policies for amending the interbank offered rates on existing floating-rate loan portfolio indexed to IBORs. Loan products are amended in a uniform way, while syndicated products, are amended in bilateral negotiations with syndicated loan partners.

The IBOR transition working group is monitoring the progress of transition from IBORs to SOFR by reviewing the total amounts of impacted contracts. The Bank also considers that a contract is not yet transitioned to an alternative benchmark rate when interest under the contract is indexed to a benchmark rate that is still subject to IBOR reform, (referred to as an 'unreformed contract').

e) Non-derivative financial Liabilities

The Bank has floating-rate liabilities indexed to USD LIBOR. The IBOR Transition team and the Bank's treasury team is in discussions with the counterparties of our financial liabilities to amend the contractual terms in response to IBOR reform.

Notes To The Financial Statements:

2.4.3 Impairment of Financial Assets

Overview of the ECL principles

The Bank assesses on a forward looking basis the expected credit losses (ECL) associated with its loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts, in this section all referred to as 'financial instruments'. The impairment methodology applied depends on whether there has been a significant increase in credit risk since initial recognition.

The measurement of ECL reflects an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes, time value of money and reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions. Equity instruments are not subject to impairment under IFRS 9.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL). The 12 months ECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECLs and 12m ECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering if it is 30 days past due. Based on the above process, the Bank groups its loans into Stage 1, Stage 2 and Stage 3, as described below:

- Stage 1: When loans are first recognised, the Bank recognises an allowance based on 12 months expected credit losses (12m ECLs). Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.
- Stage 2: When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the lifetime expected credit losses (LTECLs). Stage 2 loans also include facilities, where the credit risk has improved and the loan has been reclassified from Stage 3.
- Stage 3: These are loans considered as credit-impaired. The bank records an allowance for the LTECLs.

POCI: Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses

The calculation of ECLs

The Bank calculates ECLs based on a multiple scenario to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

PD: The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. The concept of PDs is further explained in Note 3.2.4.

EAD: The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments. The EAD is further explained in Note 3.2.4 (c).

LGD: The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD. The LGD is further explained in Note 3.2.4 (c).

When estimating the ECLs, the Bank considers multiple scenario to measure the expected cash shortfalls, discounted at an approximation to the EIR. When relevant, the assessment also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure and the value of collateral or the amount that might be received for selling the asset.

The maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Bank has the legal right to call it earlier, with the exception of revolving facilities which could extend beyond the contractual life.

Provisions for ECLs for undrawn loan commitments are assessed as set out in Note 2.20. The calculation of ECLs (including the ECLs related to the undrawn element) for revolving facilities is explained in Note 3.2.4 (c).

The mechanics of the ECL method are summarised below:

Stage 1

- The 12m ECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date.
- These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR.

Stage 2

• When a financial instruments has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. The mechanics are similar to those explained above but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.

Stage 3

• For financial instruments considered credit-impaired (as defined in Note 3), the Bank recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.

POCI

 POCI assets are financial assets that are credit impaired on initial recognition. The Bank only recognises the cumulative changes in lifetime ECLs since initial recognition, discounted by the creditadjusted EIR.

Notes To The Financial Statements:

Loan Commitments and Letters of Credit

- When estimating LTECLs for undrawn loan commitments, the Bank estimates the expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan.
- For revolving facilities that include both a loan and an undrawn commitment, ECLs are calculated
 and presented together with the loan. For loan commitments and letters of credit, the ECL is recognised
 within Provisions.

Financial Guarantee Contracts

• The Bank's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the profit or loss, and the ECL provision. For this purpose, the Bank estimates ECLs based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs. The shortfalls are discounted by the risk-adjusted interest rate relevant to the exposure. The ECLs related to financial guarantee contracts are recognised within Provisions.

Bank Overdraft and Other Revolving Facilities

The Bank's product offering includes a variety of corporate and retail overdraft and credit cards facilities, in which the Bank has the right to cancel and/or reduce the facilities with one day's notice. The Bank does not limit its exposure to credit losses to the contractual notice period, but, instead calculates ECL over a period that reflects the Bank's expectations of the customer behaviour, its likelihood of default and the Bank's future risk mitigation procedures, which could include reducing or cancelling the facilities.

Restructured Financial Assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognised and ECL is measured as follows:

- if the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating cash shortfalls from the existing asset.
- if the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

Notes To The Financial Statements:

Credit-Impaired Financial Assets

At each reporting date, the Bank assesses whether financial assets carried at amortised cost and debt instruments carried at FVOCI are credit-impaired. Financial assets are credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following:

- there is significant financial difficulty of a customer/issuer/obligor (potential bad debt indicator);
- there is a breach of contract, such as a default or delinquency in interest or principal payments;
- the Bank, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the Bank would not otherwise consider.
- it becomes probable that a counterparty/borrower may enter bankruptcy or other financial reorganisation;
- there is the disappearance of an active market for a financial asset because of financial difficulties; or
- observable data indicates that there is a measurable decrease in the estimated future cash flows from a group of financial assets.
- the financial asset is 90 days past due

A loan that has been renegotiated due to a deterioration in the borrower's financial condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a loan that is overdue for 90 days or more is considered impaired.

Collateral Valuation

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. The Bank's accounting policy for collateral assigned to it through its lending arrangements under IFRS 9 is the same is it was under IAS 39. Collateral, unless repossessed, is not recorded on the Bank's statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on a quarterly basis. However, some collateral, for example, cash or securities relating to margining requirements, is valued daily. Details of the impact of the Bank's various credit enhancements are disclosed in Note 3.

To the extent possible, the Bank uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as mortgage brokers, or based on housing price indices.

Notes To The Financial Statements:

Collateral Repossessed

The Bank's accounting policy under IFRS 9 remains the same as it was under IAS 39. The Bank's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Bank's policy.

In its normal course of business, the Bank does not physically repossess properties or other assets in its retail portfolio, but engages external agents to recover funds, generally at auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the statement of financial position.

2.4.4 Presentation of Allowance for ECL

Loan allowances for ECL are presented in the statement of financial position as follows:

- Financial assets measured at amortised cost: as a deduction from the gross carrying amount of the assets:
- Loan commitments and financial guarantee contracts: the loss allowance is recognised as a provision;
- Where a financial instrument includes both a drawn and an undrawn component, and the Bank cannot identify the ECL on the loan commitment component separately from those on the drawn component: the Bank presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision; and
- Debt instruments measured at FVOCI: no loss allowance is recognised in the statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognised in the fair value reserve.

Write-Off

The Bank writes off financial assets, in whole or part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include ceasing enforcement activity and where the Bank's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full.

The Bank may write-off financial assets that are still subject to enforcement activity.

2.4.5 Financial Liabilities

Initial and Subsequent Measurement

Financial liabilities are initially measured at their fair value, except in the case of financial liabilities recorded at FVPL, transaction costs are added to, or subtracted from, this amount. Financial liabilities, other than loan commitments and financial guarantees, are measured at amortised cost or at FVPL when they are held for trading and derivative instruments or the fair value designation is applied.

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the EIR. The Bank classifies financial liabilities as held for trading when they have been purchased or issued primarily for short-term profit making through trading activities or form part of a portfolio of financial instruments that are managed together, for which there is evidence of a recent pattern of short-term profit taking. Held-for-trading liabilities are recorded and measured in the statement of financial position at fair value.

Notes To The Financial Statements:

In both the current and prior period, all financial liabilities are classified and subsequently measured at amortised cost.

Derecognition

Financial liabilities are derecognised when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

The exchange between the Bank and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms of existing financial liabilities, is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability. In addition, other qualitative factors, such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and change in covenants are also taken into consideration.

If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognised as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortised over the remaining term of the modified liability.

Financial Guarantee Contracts and Loan Commitments

Financial guarantee contracts are contracts that require the Bank to make specified payments to reimburse the holder for a loss that it incurs because a specified debtor fails to make payment when it is due in accordance with the terms of the debt instrument. Such financial guarantees are given to banks, financial institutions and others on behalf of customers to secure loans, overdrafts and other banking facilities. Loan commitments are firm commitments to provide credit under pre-specified terms and conditions.

Financial guarantees issued or commitments to provide a loan at below-market interest rate are initially measured at fair value and the initial fair value is amortised over the life of the guarantee or the commitment. Subsequently, they are measured at the higher of the amount of loss allowance and the premium received on initial recognition less income recognised in accordance with the principles of IFRS 15.

For loan commitments and financial guarantee contracts, the loss allowance is recognised as a provision. However, for contracts that include both a loan and an undrawn commitment and the Bank cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognised together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognised as a provision.

2.5 Revenue Recognition

Interest income and expense

Interest income and expense for all interest-bearing financial instruments are recognised within 'Interest income' and 'Interest expense' in the Statement of profit or loss and othe comprehensive income using the effective interest method.

Notes To The Financial Statements:

Fees and Commission Income

Fees and commissions are generally recognised on an accrual basis when the service has been provided in line with the requirement of IFRS 15 - Revenue from Contracts with Customers. Loan commitment fees for loans that are likely to be drawn down are deferred (together with related direct costs) and recognised as an adjustment to the effective interest rate on the loan. Loan syndication fees are recognised as revenue when the syndication has been completed and the Bank has retained no part of the loan package for itself or has retained a part at the same effective interest rate as the other participants. Commission and fees arising from negotiating, or participating in the negotiation of, a transaction for a third party, are recognised on completion of the underlying transaction.

Income From Bonds or Guarantees and Letters of Credit

Income from bonds or guarantees and letters of credit are recognised on a straight line basis over the life of the bond or guarantee in accordance with the requirement of IFRS 15.

Dividend Income

Dividends are recognised in profit or loss when the entity's right to receive payment is established.

2.6 Impairment of Non-Financial Assets

Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Additionally, intangible assets that have an indefinite useful life and are not subject to amortisation are tested annually for impairment. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows (cash-generating units). The impairment test may also be performed on a single asset when the fair value less cost to sell or the value in use can be determined reliably. Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Impairment losses recognised in prior periods are assessed at each reporting date for any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. An impairment loss in respect of goodwill is not reversed.

The Bank assessed the potential accounting implications of decreased economic activity as a result of Covid-19 pandemic. The uncertainty in the economic environment may decrease the reliability of long-term forecasts used in the impairment testing models. Based on the current estimates of expected performance, no impairment needs were identified at the end of the period.

Notes To The Financial Statements:

2.7 Statement of Cash Flows

The Statement of cash flows shows the changes in cash and cash equivalents arising during the period from operating activities, investing activities and financing activities. Cash and cash equivalents include highly liquid investments.

The cash flows from operating activities are determined by using the indirect method. Net income is therefore adjusted by non-cash items, such as measurement gains or losses, changes in provisions, as well as changes from receivables and liabilities. In addition, all income and expenses from cash transactions that are attributable to investing or financing activities are eliminated.

The Bank's assignment of the cash flows to operating, investing and financing category depends on the Bank's business model (management approach). Interest received and interest paid are classified as operating cash flows, while dividends received and dividends paid are included in investing and financing activities respectively.

2.8 Cash and Cash Equivalents

Cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

For the purposes of the statement of cash flows, cash and cash equivalents include cash, due from banks and non-restricted balances with central bank.

2.9 Leases

a The Bank is the lessee

i Right-of-use assets

The Bank recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities (if any). The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentive received. Unless the Bank is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right-of- use assets are subject to impairment.

ii Short-term leases and leases of low-value assets

The Bank applies the short-term lease recognition exemption to its **short-term leases** (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of **low-value assets recognition exemption to leases** (i.e., below N1,532,500). Lease payments on short term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Notes To The Financial Statements:

B The Bank is the lessor

i Operating Lease

When assets are subject to an operating lease, the assets continue to be recognised as property and equipment based on the nature of the asset. Lease income is recognised on a straight line basis over the lease term. Lease incentives are recognised as a reduction of rental income on a straight-line basis over the lease term.

ii Finance Lease

When assets are held subject to a finance lease, the related asset is derecognised and the present value of the lease payments (discounted at the interest rate implicit in the lease) is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return.

2.10 Property, Plant and Equipment

Land and buildings comprise mainly branches and offices. All property and equipment used by the Bank is stated at historical cost less accumulated depreciation and accumulated impairment losses, if any Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Property, Plant and Equipment - con

Subsequent expenditures are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repair and maintenance costs are charged to 'Other operating expenses' during the financial period in which they are incurred.

Land included in leasehold land and buildings is not depreciated. Depreciation of other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

- Building: 50 years
- Leasehold Improvements: the lower of useful life and lease period.
- Motor vehicles: 4 years
- Furniture and fittings: 5 years
- Computer equipment: 5 years
- -Office equipment: 5 years

The assets' residual values, depreciation method and useful lives are reviewed annually, and adjusted if appropriate. Gains and losses on disposals are determined by comparing the proceeds with the carrying amount. These are included in 'Other operating expenses' in profit or loss.

Construction cost and improvements in respect of offices is carried at cost as capital work in progress. On completion of construction or improvements, the related amounts are transferred to the appropriate category of property and equipment. Payments in advance for items of property and equipment are included as Prepayments in "Other Assets" and upon delivery are reclassified as additions in the appropriate category of property, plant and equipment.

Notes To The Financial Statements:

Derecognition

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss

2.11 Intangible Assets

Costs associated with maintaining computer software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Bank, are recognised as intangible assets when the following criteria are met:

- · it is technically feasible to complete the software product so that it will be available for use;
- · management intends to complete the software product and use or sell it;
- · there is an ability to use or sell the software product;
- it can be demonstrated how the software product will generate probable future economic
- adequate technical, financial and other resources to complete the development and to use or sell the
 - software product are available; and
- the expenditure attributable to the software product during its development can be reliably measured.

Subsequent expenditure on computer software is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

Direct computer software costs recognised as intangible assets are amortised on the straight-line basis over the life of the intangible asset and are carried at cost less any accumulated amortisation and any accumulated impairment losses.

Derecognition

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

Notes To The Financial Statements:

2.12 Provisions

Provisions for restructuring costs and legal claims are recognised when: the Bank has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. The Bank recognises no provisions for future operating losses.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

2.13 Retirement Obligations and Employee Benefits

The Bank operates the following contribution and benefit schemes for its employees:

2.13.1 Defined Contribution Pension Scheme

The Bank operates a defined contributory pension scheme for eligible employees. Bank contributes 10% of the employees' Basic, Housing and Transport allowances in line with the provisions of the Pension Reform Act 2014 while employee contributes 8% summing to 18% annual contribution. The Bank pays the contributions to a pension fund administrator. The Bank has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefits expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available. The Bank has no further obligation beyond the its 10% contribution at the terminal date or disengagement.

2.13.2 Short-Term Benefits

Wages, salaries, annual leave, bonuses and non-monetary benefits are recognised as employee benefit expenses in the statement of profit or loss and paid in arrears when the associated services are rendered by the employees of the Bank.

2.14 Termination Benefits

Termination benefits are recognized as an expense when the Company is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognized in the statement of other comprehensive income if the company has made an offer for voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably.

2.15 Share Capital

(a) Share Issue Costs

Incremental costs directly attributable to the issue of new shares or options or to the acquisition of a business are shown in equity as a deduction, net of tax, from the proceeds.

(b) Dividends on Ordinary Shares

Dividends on ordinary shares are recognised in equity in the period in which they are approved by the Bank's shareholders.

Dividends for the period that are declared after the reporting date are dealt with in the subsequent events note.

Dividends proposed by the Directors but not yet approved by members are disclosed in the financial statements in accordance with the requirements of the Company and Allied Matters Act.

Notes To The Financial Statements:

2.16 Fair Value Measurement

The Bank measures some financial instruments at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- * In the principal market for the asset or liability
- * In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Bank.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. Unobservable inputs are those not readily available in an active market due to market illiquidity or complexity of the product. These inputs are generally determined based on inputs of a similar nature, historic observations on the level of the input or analytical techniques.

For assets and liabilities that are recognised in the financial statements at fair value on a recurring basis, the Bank determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

2.17 Comparatives

Except when a standard or an interpretation permits or requires otherwise, all amounts are reported or disclosed with comparative information. Where IAS 8 applies, comparative figures have been adjusted to conform with changes in presentation in the current period.

2.18 Segment Reporting

IFRS 8 requires an entity to report financial and descriptive information about its reportable segments, which are operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity about which seperate financial information is available that is evaluated regularly by the chief operating decision-maker in deciding how to allocate resources and in assessing performance. The bank has determined the (Executive Committee) as its chief operating decision maker.

Notes To The Financial Statements:

IFRS 8.20 states that an entity shall disclose information to enable users of its financial statements to evaluate the nature and financial effects of the types of business activities in which it engages and the economic environments in which it operates. Following the management approach to IFRS 8, operating segments are reported in accordance with the internal reports provided to the Bank's Managing Director (the chief operating decision maker). The following summary describes each of the bank's reportable segments.

Retail Banking

The retail banking segment offers a comprehensive range of retail, personal and commercial services to individuals, small and medium business customers including a variety of E-Business products to serve the retail banking segment.

Corporate Banking

The corporate banking segment offers a comprehensive range of commercial and corporate banking services to the corporate business customers including other meduim and large business customers. The segment covers Power and infrastructure, Oil and Gas Upstream and Downstream, Real Estate, Agro-Allied and other industries.

Investment Banking

The bank's investment banking segment is involved in the funding and management of the bank's securities, trading and investment decisions on asset management with a view of maximising the bank's shareholders returns.

3. Financial risk management and fair value measurement and disclosure

3.1 Introduction and overview

IFRS 7: An entity shall disclose information that enables users of its financial statements to evaluate the nature and extent of risks arising from financial instruments to which the entity is exposed at the end of the reporting period. Set out below is the information about the nature and extent of risks arising from the financial instruments to which the bank is exposed at the end of the reporting period.

Enterprise Risk Management

Fidelity Bank runs an Enterprise-wide Risk Management system which is governed by the following key principles:

- i) Comprehensive and well defined policies and procedures designed to identify, assess, measure, monitor and report significant risk exposures of the entity. These policies are clearly communicated throughout the Bank and are reviewed annually.
- ii) Clearly defined governance structure.
- iii) Clear segregation of duties within the Risk Management Division and also between them and the business groups.
- iv) Management of all classes of banking risk broadly categorized into credit, market, liquidity, operational risk independently but in a co-coordinated manner at all relevant levels within the Bank.
- incorporate the volatility in macro economic variables caused by Covid-19 in the inputs and assumptions used for the determination of expected credit losses ("ECLs")

Risk Management Governance Structure

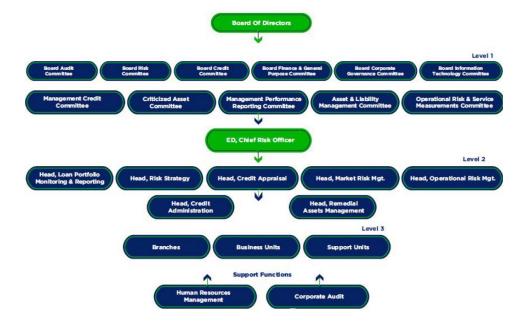

Enterprise-wide risk management roles and responsibilities are assigned to stakeholders in the Bank at three levels as follows:

Level 1 - Board/Executive Management oversight is performed by the Board of Directors, Board Audit Committee, Board Risk Committee, Board Credit Committee (BCC), Board Finance & General Purpose Committee and Executive Management Committee (EXCO).

Level 2 - Senior Management function is performed by the Management Credit Committee (MCC), Criticised Assets Committee (CAC), Asset and Liability Management Committee (ALCO), Operational Risk & Service Measurements Committee (ORSMC), Management Performance Reporting Committee (MPR), The Chief Risk Officer (CRO) and Heads of Enterprise Risk Strategy, Loan Processing, Credit Administration, Remedial Assets Management, Market Risk Management & ALM and IT & Operational Risk Management.

Level 3 - This is performed by all enterprise-wide Business and Support Units. Business and Support Units are required to comply with all risk policies and procedures and to manage risk exposures that arise from daily operations.

The Bank's Corporate Audit Division assists the Board Risk Committee by providing independent appraisal of the Bank's risk framework for internal risk assurance. The Division assesses compliance with established controls and enterprise-wide risk management methodologies. Significant risk related infractions and recommendations for improvement in processes are escalated to relevant Management and Board committees.

Enterprise Risk Philosophy Fidelity Enterprise Risk Mission

Risk Culture

The Bank's risk culture proactively anticipates and curtails losses that may arise from its banking risk underwriting. This culture evolved out of the understanding that the Bank is in a growth phase which requires strong risk management. By design therefore, the Bank operates a managed risk culture, which places emphasis on a mixture of growth and risk control to achieve corporate goals without compromising asset or service quality.

Risk Appetite

The risk appetite describes the quantum of risk that we would assume in pursuit of the Bank's business objectives at any point in time. For the Bank, it is the core instrument used in aligning the Bank's overall corporate strategy, the Bank's capital allocation and risks.

The Bank define the Bank's Risk Appetite quantitatively at two levels: Enterprise level and Business/Support Unit level.

To give effect to the above, the Board of Directors of the Bank sets target Key Performance Indicators (KPIs) at both enterprise and business/support unit levels based on recommendations from the Executive Management Committee (EXCO).

At the Business and Support unit level, the enterprise KPIs are cascaded to the extent that the contribution of each Business/Support Unit to risk losses serves as input for assessing the performance of the Business/Support Unit.

3.2 Credit Risk

3.2.1 Management of credit risk

Credit risk is the risk that the Bank will incur a loss because its customers or counterparties fail to discharge their contractual obligations. The Bank manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

Credit risk is the single largest risk for the Bank's business; management therefore carefully manages its exposure to credit risk. The credit risk management and control are centralised in a credit risk management team which reports regularly to the Board of Directors and head of each business unit.

1. Individual Approval

| Approval Authority | Approval Limit | | |
|----------------------------------------------|----------------|------------|--|
| | Amount | Tenor | |
| Business-Facing Executive Director | N100M | All Tenors | |
| Managing Director/Chief Executive Officer | N200M | All Tenors | |

2. Committee Approval

| 21 Committee Tipprovar | | | | | | | |
|------------------------|------------|-----------------------------|--------|------------|-------------|--|--|
| Approving Authority | Manag | Management Credit Committee | | | Board | | |
| Tenors | Up to 2yrs | 3-5yrs | >5yrs | All Tenors | All Tenors | | |
| Obligor Risk Rating | | Amount | | | | | |
| AAA-A | N3bn | N2.0bn | N1.0bn | N7.5bn | Above BCC | | |
| BBB-B | N2bn | N1.50bn | N1.0bn | N5.0bn | limit up to | | |
| CCC | N0.5bn | N0.3bn | Nil | N2.0bn | Single | | |

- The Bank assigns credit approval authorities to individuals according to their qualifications, experience, training and quality of previous credit decisions. These are also reviewed by the Bank periodically.
- The Bank measures and consolidates all the Bank's credit exposures to each obligor on a global basis. The Bank's definition of an "obligor" include a group of individual borrowers that are linked to one another by any of a number of criteria the Bank have established, including capital ownership, voting rights, demonstrable control, other indication of group affiliation; or are jointly and severally liable for all or significant portions of the credit the Bank have extended.
- The Bank's respective business units are required to implement credit policies and procedures while processing credit approvals including those granted by Management and Board Committees.
- Each business unit is responsible for the quality, performance and collection of its credit portfolio including those approved by the Management and Board Committees.
- The Bank's Credit Control and Loan Portfolio Monitoring & Reporting departments regularly undertake independent audit and credit quality reviews of credit portfolios held by business units.

3.2.2 Credit Risk Ratings

A primary element of the Bank's credit approval process is a detailed risk assessment of every credit associated with a counter-party. The Bank's risk assessment procedures consider both the credit worthiness of the counter-party and the risks related to the specific type of credit facility or exposure. This risk assessment not only affects the structuring of the transaction and the outcome of the credit decision, but also influences the level of decision-making authority required to extend or materially change the credit and the monitoring procedures we apply to the on-going exposure.

The Bank has its own in-house assessment methodologies and rating scale for evaluating the creditworthiness of it's counter-parties. The Bank's programmed 9-grade rating model was developed in collaboration with Agusto & Company, a foremost rating agency in Nigeria, to enable comparism between the Bank's internal ratings and the common market practice, which ensures comparability between different portfolios of the Bank.

3.2.2 Credit risk ratings - continued

| Bank rating | Applicable score band | Agusto & Co. | Description of the grade |
|-------------|-----------------------|--------------|--------------------------------------------------------------------------------------------------------------|
| | | | Investment grade |
| AAA | 90% - 100% | AAA | Exceptionally strong business fundamentals and overwhelming capacity to meet obligations in a timely manner. |
| | | | Standard Monitoring |
| AA | 80% - 89% | AA | Very good business fundamentals and very strong capacity to meet obligations |
| A | 70% - 79% | A | Good business fundamentals and strong capacity to meet obligations |
| BBB | 60%- 69% | ввв | Satisfactory business fundamentals and adequate capacity to meet obligations |
| ВВ | 50% - 59% | ВВ | Satisfactory business fundamentals but ability to repay may be contingent upon refinancing. |
| В | 40% - 49% | В | Weak business fundamentals and capacity to repay is contingent upon refinancing. |
| CCC | 30% - 39% | ccc | Very weak business fundamentals and capacity to repay is contingent upon refinancing. |
| CC | 20% - 29% | СС | Very weak business fundamentals and capacity to repay in a timely manner may be in doubt. |
| | | | Default |
| С | 0% - 19% | С | Imminent Solvency |

We generally rate all the Bank's credit exposures individually. The rating scale and its mapping to the Standard and Poors agency rating scale is as follows:

| Internal Rating Categories | Interpretation | Mapping to External Rating (S&P) |
|----------------------------------|---------------------------------------------------------------------------------------------------|----------------------------------------|
| AAA | Impeccable financial condition and overwhelming capacity to meet obligations in a timely manner | AAA |
| AA | Very good financial condition and very low likelihood of default | AA |
| A | Good financial condition and low likelihood of default | A |
| BBB to BB | Satisfactory financial condition and adequate capacity to meet obligations | BBB to BB |
| B to CCC | Weak financial condition and capacity to repay is in doubt and may be contingent upon refinancing | B to D |

3.2.3 Credit Limits

Portfolio concentration limits are set by the Bank to specify maximum credit exposures we are willing to assume over given periods. The limits reflect the Bank's credit risk appetite. The parameters on which portfolio limits are based include limits per obligor, products, sector, industry, rating grade, geographical location, type of collateral, facility structure and conditions of the exposure.

Monitoring Default Risk

The Bank's credit exposures are monitored on a continuing basis using the risk management tools described above. The Bank has also put procedures in place to identify at an early stage credit exposures for which there may be an increased risk of loss. Counter-parties that on the basis of the application of the Bank's risk management tools, demonstrate the likelihood of problems, are identified well in advance so that the Bank can effectively manage the credit exposure and maximize the recovery. The objective of this early warning system is to address potential problems while adequate alternatives for action are still available. This early risk detection is a tenet of the Bank's credit culture and is intended to ensure that greater attention is paid to such exposures. In instances where the Bank has identified counter-parties where problems might arise, the respective exposure is placed on a watch-list.

3.2.4 Expected Credit Loss Measurement

The table below summarises the impairment requirements under IFRS~9~(other~than~purchased~or~originated~credit-impaired~financial~assets):

Change in credit quality since initial recognition

| Stage 1 | Stage 2 | Stage 3 |
|---------------------------------|---------------------------------------------------------------|--------------------------|
| Initial recognition | Significant increase in credit risk since initial recognition | Credit-impaired assets |
| 12 | . * | Lifetime expected credit |
| 12 month expected credit losses | losses | losses |

(a) Significant Increase In Credit Risk

At initial recognition, the Bank allocates each exposure to a credit risk grade based on available information about the borrower that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined and calibrated such that the risk of default occurring increases as the credit risk deteriorates.

The Bank monitors its loans and debt portfolios to determine when there is a significant increase in credit risk in order to transition from stage 1 to stage 2. In assessing significant increase in credit risk, management considers credit rating, prudential classification and backstop (30 days past due presumption) indicators. Financial assets that have been granted forbearance could be considered to have significantly increased in credit risk.

Backstop Indicators

A backstop is applied and the financial instrument considered to have experienced a significant increase in credit risk if the borrower is more than 30 days past due on its contractual payments.

For assessing increase in credit risk, the Bank sets the origination date of revolving and non-revolving facilities as the last reprice date i.e. the last time the lending was re-priced at a market rate.

(b) Definition of Default

The Bank considers a financial asset to be in default which is fully aligned with the credit-impaired, when it meet the following criteria:

Quantitative criteria

- · Internal credit rating Downgrade from Performing to Non-performing (rating grids CC and below)
- Days past due (Dpd) observation DPDs of 90 days and above
- · Prudential classification of sub-standard, doubtful or lost

(c) Measuring ECL - Explanation of inputs, assumptions and estimation techniques

The Expected Credit Loss (ECL) is measured on either a 12-month (12M) or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation (as per "Definition of default and credit-impaired" above), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Bank expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For a revolving commitment, the Bank includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.
- Loss Given Default (LGD) represents the Bank's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The ECL is determined by projecting the PD, LGD and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e. the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The Lifetime PD is derived by using historical data to develop specific lifetime PD models for all asset classes. The long term span of historical data is then used to directly model the PD across the life of a exposure. For debt instruments that are not internally rated, the Bank obtains the issuer ratings of such instruments and matches them to its internal rating framework to determine the equivalent rating. The lifetime PD curves developed for that rating band will then be used.

The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type.

The assumptions underlying the ECL calculation – such as how the maturity profile of the PDs and how collateral values change etc. – are monitored and reviewed on a regular basis.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

(d) Forward-Looking information incorporated in the ECL models

The assessment of SICR and the calculation of ECL both incorporate forward-looking information. The Bank has performed historical analysis and identified the key economic variables impacting credit risk and expected credit losses for each portfolio.

These economic variables and their associated impact on the PD, EAD and LGD vary by financial instrument. Expert judgment has also been applied in this process. Forecasts of these economic variables (the "base economic scenario") are provided by the Bank's strategy team on a quarterly basis. The specific macro-economic model applied is a Markov multi-state model of transitions in continuous time with macroeconomic co-variates. The impact of these economic variables on the PD, EAD and LGD has been determined by performing statistical regression analysis to understand the impact these variables have had historically on default rates and on the components of LGD and EAD.

In addition to the base economic scenario, the Bank's strategy team also provides other possible scenarios along with scenario weightings. The number of other scenarios used is based on the analysis of each major product type to ensure non-linearities are captured. The number of scenarios and their attributes are reassessed at each reporting date. At 1 January 2023 and 30 June 2023, the Bank concluded that Six month scenarios appropriately captured non-linearities for all its portfolios.

As with any economic forecasts, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The Bank considers these forecasts to represent its best estimate of the possible outcomes and has analysed the non-linearities and asymmetries within the Bank's different portfolios to establish that the chosen scenarios are appropriately representative of the range of possible scenarios.

Economic Variable Assumptions

The most significant period-end assumptions used for the ECL estimate as at 30 September 2023 are set out below. The scenarios "base", "upside" and "downside" were used for all portfolios.

| | | 6M | 2024 | 2025 | 2026 |
|---------------------------|------------|--------|----------|--------|--------|
| Foreign exchange rate (N) | | | | | |
| | Base Case | 850 | 880 | 900 | 920 |
| | Best Case | 744 | 760 | 836 | 806 |
| | Worse Case | 1,190 | 1,232 | 1,260 | 1,288 |

| | Worse Case | 34.65% | 31.18% | 28.07% | 25.26% |
| | | | | | |

(e) Grouping Financial Instruments For Collective Assessment

For expected credit loss provisions modelled on a collective basis, a grouping of exposures is performed on the basis of shared risk characteristics, such that risk exposures within a group are homogeneous.

In performing this grouping, there must be sufficient information for the group to be statistically credible. Where sufficient information is not available internally, the Bank has considered benchmarking internal/external supplementary data to use for modelling purposes. The characteristics used to determine groupings include instrument type, credit risk ratings and industry.

The aggregation of financial instruments may change over time as new information becomes available.

3.2.5 Maximum Exposure to credit risk before collateral held or other credit enhancements

The Bank's maximum exposure to credit risk as at 30 September, 2023 and 31 December 2022 is represented by the gross carrying amounts of the financial assets set out below:

| | Maximum exposure | Fair value of Collateral held | Surplus collateral | Net exposure |
|---------------------------------------------------------------------|------------------|----------------------------------|-----------------------|--------------|
| Financial Assets | | 30 Septeml | ber 2023 | |
| | N'million | N'million | N'million | N'million |
| Balances with central bank | 152,138 | - | - | 152,138 |
| Restricted balances with central bank | 938,917 | | | 938,917 |
| Due from banks | 323,021 | - | - | 323,021 |

3.2.7 Credit Quality

A Maximum Exposure to Credit Risk – Financial instruments subject to impairment

The credit risk model is applied as per homogeneous group of risk assets which can be a portfolio or a rating model (e. g. Master Rating). The bank set up 6 portfolios, three of which are a mix of Corporate and Commercial Accounts segregated on the basis of related economic sectors. The other three portfolios are made up of retails accounts segregated on the basis of similarity of risk characteristics. Details of the portfolios are shown below:

| Code | Description |
|-------------|----------------------------------------------------------------|
| Portfolio 1 | Agriculture, Energy, Manufacturing, Construction & Real Estate |
| Portfolio 2 | Government, Public Sector & NBFIs |
| Portfolio 3 | Transport, Communication, Commerce & General |
| Portfolio 4 | Automobile, Equipment & Mortgage Loans |
| Portfolio 5 | Medium and Small Scale Enterprises |
| Portfolio 6 | Personal & Employee Loans |

The following table contains an analysis of the credit risk exposure of financial instruments for which an ECL allowance is recognised. The gross carrying amount of financial assets below also represents the Bank's maximum exposure to credit risk on these assets.

a) Agriculture, Energy, Manufacturing, Construction & Real Estate Portfolio

| | | 30 September 2023 | | | | |
|-----------------------|-------------|-------------------|------------|-----------|--|--|

B Maximum Exposure To Credit Risk – Financial instruments not subject to impairment

The following table contains an analysis of the maximum credit risk exposure from financial assets not subject to impairment i.e. fair value through profit or loss (FVTPL):

Maximum exposure to credit risk

| | 2023 N'million | 2022 N'million |
|------------------------------------------------------------------|-------------------|-------------------|
| Financial assets designated at fair value through profit or loss | | |
| • Debt securities | | |
| Federal Government bonds | 4,458 | 351 |
| Treasury bills | 16,222 | 1,685 |
| Placements | - | - |
| | 20,680 | 2,036 |
| Derivative financial assets | 34,854 | 4,778 |

The credit rating of cash and cash equivalents, short-term investments and investments in government and corporate securities that were neither past due nor impaired can be assessed by reference to the bank's internal ratings as at 30 September 2023 and 31 December 2022:

| | | In | vestments in Gov | ernment Securi | ties | |
|-------------------|-------------------------|-------------------|-----------------------|----------------|--------------------|-----------|

| Unrated | _ | _ | _ | - | - | _ |
| | 146,101 | 280,277 | 207,841 | 2,256 | 20,780 | 657,256 |

Loss allowance

The loss allowance recognised in the period is impacted by a variety of factors, as described below:

- Additional allowances for new financial instruments recognised during the period, as well as releases for financial instruments derecognised in the period;
- Impact on the measurement of ECL due to changes in PDs, EADs and LGDs in the period, arising from regular refreshing of inputs to models;
- Discount unwind within ECL due to the passage of time, as ECL is measured on a present value basis; and
- Foreign exchange retranslations for assets denominated in foreign currencies and other movements.

3.2.8 Description of Collateral Held

Potential credit losses from any given exposure are mitigated using a range of tools including collateral securities, insurance bonds and policies as well as different forms of guarantees. The Bank assesses the degree of reliance that can be placed on these credit risk mitigants carefully in the light of issues such as legal enforceability, market valuation, correlation with exposure and the counterparty risk of the guarantor.

(a) Key Collateral Management Policies

The Bank's risk mitigation policies determine the eligibility of collateral types. Eligible collateral types for credit risk mitigation include: cash; residential, commercial and industrial property in acceptable locations; fixed assets such as motor vehicles, plant and machinery; marketable securities; bank guarantees; confirmed domiciliation of payments; credit and insurance bonds, warehouse warrants, lien oshipping documents; back-to-back letters of credit; etc. The Bank also enters into collateralised reverse repurchase agreements where appropriate. For certain types of lending, typically mortgages and asset financing, the right to take charge over physical assets is a significant consideration in determining appropriate pricing and recoverability in the event of default.

The Bank reports collateral values in accordance with the Bank's risk mitigation policy, which prescribes the frequency of valuation for different collateral types, based on the level of price volatility of each type of collateral and the nature of the underlying product or risk exposure. Depending on the nature of the collateral, frequent or periodic evaluations are carried out to determine the adequacy of collateral margins. Services of independent professional appraisers are used where the Bank lacks adequate internal valuation capability or where dictated by industry practice or legal requirements. Where appropriate, collateral values are adjusted to reflect current market conditions, the probability of recovery and the period of time to realise the collateral in the event of repossession.

The Bank will only grant unsecured loans where clean lending is a market feature and insistence on security would compromise Bank's market share. In such an instance, the Bank ensures that the borrower has proven record of sound financial condition and ability to repay the loan from internal sources in the ordinary course of business. In addition, we ensure that total outstanding borrowings of the obligor do not exceed 70% of estimated asset value.

The Bank believes that the requirement for collateral is not a substitute for the ability to pay, which is a primary consideration in the Bank's lending decisions. Although the Bank will usually collaterise its credit exposure to a customer, such an obligor is expected to repay the loan in the ordinary course of business without forcing the Bank to look to the collateral for ultimate repayment. Therefore, if while reviewing a loan request, there is the possibility that the collateral will need to be relied upon to repay the loan, the Bank will not grant the facility.

Where guarantees are used for credit risk mitigation, the creditworthiness of the guarantor is assessed and established using the credit approval process in addition to that of the obligor or main counterparty.

Management of secured credits requires periodic inspections of the collateral to ensure its existence and adequacy for the bank's exposure. These inspections include examination of security agreements to determine enforceability of liens, verification of adequate insurance protection, proper legal registration and adequacy of overall safeguards.

When obligations are secured by marketable securities, predetermined maintenance margins are established and the securities are liquidated if the value falls to this limit except if additional and satisfactory security is provided. In all cases, only valuations done at the instance of the Bank can be considered acceptable for the purposes of credit risk mitigation. The Bank ensures that all properties and chattels pledged as collateral are properly and adequately insured with the Bank's interest duly noted as first loss beneficiary. Only insurance policies obtained from an insurance firm in the Bank's pre-approved list of Insurance Companies are acceptable as eligible collateral.

The Bank's policies regarding obtaining collateral have not significantly changed during the reporting period and there has been no significant change in the overall quality of the collateral held by the Bank since the prior period.

The following table indicates the Bank's credit exposures by class and value of collaterals:

| | 30 September 2023 Collateral | | 31 December 2022 Collateral | | |
|---------------------------------------|---------------------------------|------------|--------------------------------|------------|--|
| | Exposure | Value | Exposure | Value | |
| | N'million | N'million | N'million | N'million | |
| Secured against real estate | 182,573 | 785,217 | 502,967 | 1,594,056 | |
| Secured by shares of quoted companies | - | | - | | |
| Secured by others | 2,502,460 | 13,093,307 | 1,683,724 | 10,968,566 | |
| Unsecured | 79,755 | - | 10,069 | - | |
| Gross Loans and Advances to Customers | 2,764,788 | 13.878.523 | 2,196,760 | 12,562,622 | |

The Bank closely monitors collateral held for financial assets considered to be credit-impaired, as it becomes more likely that the Bank will take possession of collateral to mitigate potential credit losses.

3.3 Liquidity Risk

Liquidity risk is the risk that the Bank is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfil commitments to lenders.

3.3.1 Management of Liquidity Risk

The Bank's principal liquidity objective is to ensure that the Bank holds sufficient liquid reserve to enable it meet all probable cashflow obligations, without incurring undue transaction costs under normal conditions. Liquidity management safeguards the ability of the bank to meet all payment obligations as they fall due. The Bank's liquidity risk management framework has been an important factor in maintaining adequate liquidity and a healthy funding profile during the year and is structured to identify, measure and manage the Bank's liquidity risk at all times. The Board approved liquidity policy guides the management of liquidity risk strategically through the Board Risk Committee (BRC) as well as Asset and Liability Committee (ALCO) and daily by the ALM group. The liquidity management framework is designed to identify measure and manage The Bank's liquidity risk position at all times. Underlying Assets and Liabilities Management policies and procedures are reviewed and approved regularly by the Assets and Liability Management Committee (ALCO).

The Bank has established liquidity and concentration limits and ratios, tolerance levels as well as triggers, through which it identifies liquidity risk. It also uses gap analysis to identify short, medium and long term mismatches, deploying gapping strategies to appropriately manage them. Periodic monitoring is carried out to trigger immediate reaction to deviations from set limits.

Short-Term Liquidity

The Bank's reporting system tracks cash flows on a daily basis. This system allows management to assess the Bank's short-term liquidity position in each location by currency and products. The system captures all of the Bank's cash flows from transactions on the Bank's Statement of financial position, as well as liquidity risks resulting from off-balance sheet transactions. We take account of products that have no specific contractual maturities by extrapolating from their historical behaviour of cash flows.

Asset Liquidity

The asset liquidity component tracks the volume and booking location of the Bank's inventory of unencumbered liquid assets, which we can used to raise liquidity in times of need. The liquidity of these assets is an important element in protecting us against short-term liquidity squeezes. We keep a portfolio of highly liquid securities in major currencies around the world to supply collateral for cash needs associated with clearing activities.

Management of Liquidity Risk - continued

Funding Diversification

Diversification of the Bank's funding profile in terms of investor types, regions, products and instruments is also an important element of the Bank's liquidity risk management practices. In addition, the bank invests in liquid assets to facilitate quick conversion to cash, should the need arise.

Stress Testing

As a result of volatilities which take place in the Bank's operating environment, the Bank conducts stress tests to evaluate the size of potential losses related to rate movements under extreme market conditions. These are conducted on elements of its trading portfolio and the balance sheet in response to the economic and market outlook. Consideration is given to historical events, prospective events and regulatory guidelines. The Bank, after ALCO's authorization, responds to the result of this activity, by modifying the portfolio and taking other specific steps to reduce the expected impact in the event that these risks materialize.

3.3.2 Maturity Analysis

The table below analyses financial assets and liabilities of the Bank into relevant maturity bands based on the remaining period at reporting date to the contractual maturity date. The table includes both principal and interest cash flows.

3.4 Market Risk

The Bank takes on exposure to market risks, which is the risk that the fair value or future cash flows of a financial instrument will be adversely affected by changes in market prices such as interest rates, foreign exchange rates, equity prices and commodity prices.

3.4.1 Management of Market Risk

Essentially, the banking business in which the Bank is engaged is subject to the risk that financial market prices and rates will move and result in profits or losses for us. Market risk arises from the probability of adverse movements in financial market prices and rates. The Bank's definition of financial market prices in this regard refer to interest rates, equity prices, foreign exchange rates, commodity prices, the correlations among them and their levels of volatility. Interest rate and equity price risks consist of two components each: general risk, which describes value changes due to general market movements, and specific risk which has issuer-related causes.

3.5 Operational Risk Management

Operational risk is the potential for loss arising from inadequate or failed internal processes, people and systems or from external events. This definition includes legal and regulatory risk, but excludes strategic and reputational risk.

The scope of operational risk management in the Bank covers risk exposures that may lead to unavailability of service, information deficiency, financial loss, increased costs, loss of professional reputation, failure to keep or increase market share, risks which result in the imposition of sanctions on the Bank by regulators or legal proceedings against the Bank by third parties.

- The event of Covid-19 situation made the Bank put additional focus on several operational risk aspects, such as:
- Business continuity plans to support our employees, customers and overall businesses.
- Potential increase of cyber risk due to new conditions in business management and remote working. Our cyber security programme continued to be improved by strengthening detection, response and protection mechanisms.
- Increase in technological support in order to ensure adequate customer service and correct performance of our services, especially in online banking and call centres.

Organizational Set-up

Operational Risk Management is an independent risk management function within Fidelity Bank. The Operational Risk & Service Measurements Committee is the main decision-making committee for all operational risk management matters and approves the Bank's standards for identification, measurement, assessment, reporting and monitoring of operational risk. Operational Risk Management is responsible for defining the operational risk framework and related policies while the responsibility for implementing the framework day-to-day operational risk management lies with the Bank's business and support units. Based on this business partnership model the Bank ensures close monitoring and high awareness of operational risk.

Operational Risk Framework

As is common with all businesses, operational risk is inherent in all operations and activities of the Bank. We therefore carefully manage operational risk based on a consistent framework that enables us to determine the Bank's operational risk profile in comparison to the Bank's risk appetite and to define risk mitigating measures and priorities. We apply a number of techniques to efficiently manage operational risk in the Bank's business, for example: as part of the Bank's strategy for making enterprise risk management the Bank's discriminating competence, the Bank has redefined business requirements across all networks and branches using the following tools:

Loss Data Collection

The Bank implements an event driven Loss Data Collection (LDC) system designed to facilitate collection of internal loss data triggered at the occurrence of a loss event anywhere within the divisions of the Bank. The LDC system captures data elements, which discriminate between boundary events related to credit, market and operational risk. The system facilitates collection of loss data arising from actual losses, potential losses and near misses. Work-flow capabilities built within the Bank's predefined Event Escalation Matrix enable risk incidents to be reported to designated Event Identifiers, Event Managers, Event Approvers and Action Owners that manage each risk incident from point of occurrence to closure.

Risk and Control Self Assessments (RCSA)

The Bank implement a quantitative methodology for the Bank's Risk and Control Self Assessments, which supports collection of quantitative frequency and severity estimates. Facilitated top-down RCSA workshops are used by the bank to identify key risks and related controls at business unit levels. During these workshops business experts and senior management identify and discuss key risks, controls and required remedial actions for each respective business unit and the results captured within the operational risk database for action tracking.

3.6 Operational Risk Management - contnued Kev Risk Indicators (KRIs)

The Bank measures quantifiable risk statistics or metrics that provide warning signals of risk hotspots in the Bank's entity. The Bank has established key risk indicators with tolerance limits for core operational groups of the Bank. The Bank's KPI database integrates with the Loss Data Collection and Risk & Control Self Assessment models and systems to provide red flags that typically inform initiatives for risk response actions in the Bank.

Business Continuity Management (BCM)

The Bank recognises that adverse incidences such as technology failure, natural and man-made disasters could occur and may affect the Bank's critical resources leading to significant business disruption. To manage this risk, our BCM plans assist is in building resilience for effective response to catastrophic events. In broad categories, the plans which are tested periodically, cover disaster recovery, business resumption, contingency planning and crisis management.

4. Capital Management

The Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of statement of financial position, are:

a.To comply with the capital requirements set by the regulators of the banking markets where the entities within the Bank operate;

b. To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders;

c. To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored daily by the Bank's management, employing techniques based on the guidelines developed by the Central Bank of Nigeria (CBN), for supervisory purposes. The required information is filed with the CBN on a monthly basis.

The CBN requires each bank to: (a) hold the minimum level of the regulatory capital of N25 billion and (b) maintain a ratio of total regulatory capital to the risk-weighted asset at or above the minimum of 15% for an international licensed Bank.

In 2016, the Central Bank of Nigeria issued circular BSD/DIR/CIR/GEN/LAB/06/03 to all Bank's and discount houses on the implementation of Basel II/III issued 10 December 2013 and guidance notes to the regulatory capital measurement and management for the Nigerian Banking System for the implementation of Basel II/III in Nigeria. The capital adequacy ratio for the period ended 30 June 2023 and the comparative period 31 December 2022 is in line with the new circular. The computations are consistent with the requirements of Pillar I of Basel II ACord (Interenal Convergence of capital measurement and Capital Standards. Although the guidelines comply with the requirement of the Basel II accord certain sections were adjusted to reflect the peculiarities of the Nigerian environment.

The Bank's regulatory capital as managed by its Financial Control and Treasury Units is made up of Tier 1 and Tier 2 capital as follows:

Tier 1 capital: This includes only permanent shareholders' equity (issued and fully paid ordinary shares/common stock and perpetual non-cumulative preference shares) and disclosed reserves (created or increased by appropriations of retained earnings or other surpluses). There is no limit on the inclusion of Tier 1 capital for the purpose of calculating regulatory capital.

Tier 2 capital: This includes revaluation reserves, general provisions/general loan loss reserves, Hybrid (debt/equity), capital instruments and subordinated debt. Tier 2 capital is limited to a maximum of 33.3% of the total of Tier 1 capital.

The CBN excluded the following reserves in the computation of total qualifying capital:

- 1 The Regulatory Risk Reserve created pursuant to Section 12.4 (a) of the Prudential Guidelines which was effective on 1 July 2010 is excluded from regulatory capital for the purposes of capital adequacy assessment;
- 2 Collective impairment on loans and receivables and other financial assets no longer forms part of Tier 2 capital; and
- 3 Other Comprehensive Income (OCI) Reserves is recognized as part of Tier 2 capital subject to the limits on the Calculation of Regulatory Capital.

6 Interest and similar income using effective interest rate method

| | Q3 2023 | Q3 2022 | 30 Sept 2023 | 30 Sept 2022 |
|-------------------------------------------------|-----------|-----------|--------------|--------------|
| | N'million | N'million | N'million | N'million |
| Loans and advances to customers | 96,476 | 59,391 | 260,512 | 163,209 |
| Advances under finance lease | 555 | 1,173 | 1,964 | 3,806 |
| Treasury bills and other investment securities: | 0 | 0 | 0 | 0 |
| -Fair value through other comprehensive income | 3,717 | 2,859 | 6,079 | 6,290 |
| -Amortised cost | 14,985 | 8,392 | 37,008 | 24,614 |
| Placements and short term funds | 428 | 143 | 1,020 | 387 |
| · · | 116,161 | 71,958 | 306,584 | 198,306 |

Interest and similar income represents interest income on financial assets measured at amortised cost and Fair value through other comprehensive income.

7 Interest expense calculated using the effective interest rate method

| | Q3 2023 | Q3 2022 | 30 Sept 2023 | 30 Sept 2022 |
|---------------------------------------|-----------|-----------|--------------|--------------|
| | N'million | N'million | N'million | N'million |
| Term deposits | 28,097 | 21,400 | 77,912 | 54,896 |
| Debts issued and other borrowed funds | 10,055 | 11,704 | 25,040 | 33,112 |
| Savings deposits | 5,822 | 2,688 | 15,552 | 4,812 |
| Current accounts | 1,572 | 1,158 | 4,339 | 3,111 |
| Inter-bank takings | 0 | 29 | 67 | 33 |
| Intervention loan | 2,238 | 935 | 6,952 | 2,538 |
| | 47,785 | 37,915 | 129,862 | 98,502 |

Total interest expense is calculated using the effective interest rate method as reported above and does not include interest expense on financial liabilities carried at fair value through profit or loss.

9 Net fee and commission income

Fee and commission income is disaggregated below and includes a total fees in scope of IFRS 15, Revenues from Contracts with Customers:

| | 30 September 2023 | | | | | |
|---------------------------------------------------|-------------------|-----------|--------------|--------------|--|--|
| Segments | Q3 2023 | Q3 2022 | 30 Sept 2023 | 30 Sept 2022 | | |
| | N'million | N'million | N'million | N'million | | |
| Fee and commision type: | | | | | | |
| ATM charges | 2,314 | 2,440 | 8,296 | 6,521 | | |
| Accounts maintenance charge | 2,332 | 1,218 | 5,709 | 3,560 | | |
| Commission on E-banking activities | 994 | 896 | 2,848 | 2,244 | | |
| Commission on travellers cheque and foreign bills | 1,598 | 801 | 3,708 | 2,278 | | |
| Commission on fidelity connect | 613 | 417 | 2,746 | 1,478 | | |
| Letters of credit commissions and fees | 1,303 | 824 | 3,624 | 1,986 | | |
| Commissions on off balance sheet transactions | 869 | 651 | 2,886 | 1,733 | | |
| Other fees and commissions | 206 | -19 | 596 | 327 | | |
| Commission and fees on banking services | 204 | 157 | 571 | 401 | | |
| Commission and fees on NXP | 215 | 246 | 283 | 609 | | |
| Collection fees | 75 | 80 | 246 | 229 | | |
| Telex fees | 419 | 278 | 1,054 | 890 | | |
| Cheque issue fees | 16 | 18 | 50 | 55 | | |
| Remittance fees | 16 | 27 | 53 | 100 | | |
| Total revenue from contracts with customers | 11,176 | 8,032 | 32,671 | 22,412 | | |
| Other non-contract fee income: | | | | | | |
| Credit related fees | 1,111 | 926 | 3,762 | 2,630 | | |
| Total fees and commission income | 12,286 | 8,958 | 36,433 | 25,042 | | |
| Fee and commission expense | -1,981 | (3,421) | -9,646 | (9,447) | | |
| Net fee and commission income | 10,305 | 5,537 | 26,786 | 15,595 | | |

The fees and commission income reported above excludes amount included in determining effective interest rates on financial assets that are not carried at fair value through profit or loss.

10 Derecognition loss on financial asset

The table below shows the modification charge on financial instruments for the period 30 June 2023 recorded in profit or loss :

| | 30 Sept 2023 | 30 Sept 2022 |
|----------------------------------------|--------------|--------------|
| | N'million | N'million |
| Modified Loan Assets (Carrying Amount) | - | 2,253 |
| Specific allowances for impairment | <u> </u> | - |
| | <u> </u> | 2,253 |
| Derecognition loss | | 0.37 |
| | | 0 |

In line with IFRSs, derecognition is carried out when the cash flows of the modified assets are substantially different from the contractual cash flows of the original financial assets. However, no modification was carried out on a loan to a customer during the period.

11 Other operating income

| | Q3 2023 | Q3 2022 | 30 Sept 2023 | 30 Sept 2022 |
|-----------------------------------------------------|-----------|-----------|--------------|--------------|
| | N'million | N'million | N'million | N'million |
| Net foreign exchange gains | -7,170 | 3,866 | 24,993 | 2,356 |
| Dividend income | 1,553 | -0 | 2,018 | 370 |
| Profit on disposal of property, plant and equipment | 0 | 9 | 48 | -75 |
| Profit on disposal of unquoted securities | 0 | 0 | 0 | 0 |
| Loan Recoveries | 107 | 83 | 418 | 3,795 |
| Other income | 2 | 7 | 66 | 54 |
| | (5,508) | 3,965 | 27,542 | 6,500 |

- 11a Dividend income represent dividend received from the Bank's investment in equity instruments held for strategic purposes and for which the Bank has elected to present the fair value and loss in other comprehensive income. See note 2.4.2.b
- 11b Net foreign exchange gain represent unrealised gains from the revaluation of foreign currency-denominated assets and liabilities held in the non-trading books.
- 11c Loan recoveries represents amount recovered for previously written-off facilities. The amount is recognised on a cash basis only.
- 11d Other income relates to other miscelanoue income made during the financial year.
- 12 Net (gains) from financial instruments classified as fair value through profit or loss

| Net losses from financial instruments classified as held for trading | Q3 2023 N'million | Q3 2022 N'million | 30 Sept 2023 N'million | 30 Sept 2022 N'million |
|----------------------------------------------------------------------|----------------------|----------------------|---------------------------|---------------------------|
| Net (losses)/gains arising from: | | | | |
| - Bonds | 216 | -1,183 | 836 | 32 |
| - Treasury bills | -4,467 | 75 | -649 | 190 |
| - Placements | 0 | 0 | 0 | 0 |
| - Derivatives | -0 | -562 | 19,010 | -1,026 |
| | (4,251) | (1,670) | 19,197 | (804) |
| | | | | |
| 2.1 Other interest and similar income measured at FVTPL | 18.754 | 2,169 | 18,236 | 12,046 |

Other interest income on financial assets measured at FVTPL are not calculated using the effective interest rate method and have been presented separately in the statement of profit or loss and other comprehensive income.

¹⁵a Banking sector resolution cost represents AMCON a statutory levy chargeable annually on every Bank's total assets in Nigeria. This is applicable on total balance sheet size of the Bank. The current applicable rate in Nigeria based on AMCON Act of 2021 is 0.5% of total assets (inclusive of off-balance sheet)

16 Taxation

| a Income tax expense | 30 Sept 2023 N'million | 30 Sept 2022 N'million |
|---------------------------------------------------------------------------------|---------------------------|---------------------------|
| Current taxes on income for the period (Minimum tax) | 15,397 | 1,363 |
| Tertiary education tax (note 16g) | 2.444 | 997 |
| Police Trust Fund (note 16e) | 6 | 2 |
| National Agency for science and engineering infrastructure 0.25% | 277 | 95 |
| Information Technology levy (note 16f) | 1,110 | 378 |
| Capital Gain Tax | 5 | 0 |
| Current income tax expense | 19,239 | 2,834 |
| Deferred tax expense | 0 | 0 |
| | 19,239 | 2,834 |
| b | | |
| Total income tax expense in profit or loss | 30 Sept 2023 | 30 Sept 2022 |
| | N'million | N'million |
| Profit before income tax | 110,992 | 37,792 |
| Income tax using the domestic corporation tax rate of 32.5% (Dec 2022 : 32.5%) | 36,627 | 12,282 |
| Non-deductible expenses | 5,837 | -1,116 |
| Tax exempt income | -42,464 | -2,283 |
| Utilization of previously unrecognised tax losses | | |
| Unrecognised deferred tax assets | 0 | -8,883 |
| Income Tax expense based on Minimum tax (note 16d) | 15,397 | 1,363 |
| Amount recognised due to difference in tax rates | | 0 |
| Tertiary education tax (note 16g) | 2,444 | 997 |
| Capital gain tax | 5 | 0 |
| Police Trust Fund (note 16e) | 6 | 2 |
| National Agency for science and engineering infrastructure 0.25% | 277 | 94 |
| Information Technology levy (note 16f) | 1.110 | |
| Deferred Tax expense | 0 | 378 |
| • | 19,239 | 2,834 |
| Effective tax rate | · | |
| The effective income tax rate is 17.3% (31 December 2022: 12.95%). | | |
| | 30 Sept 2023 | 30 Sept 2022 |
| c The movement in the current income tax payable is as follows: | N'million | N'million |
| At 1 January | 8,446 | 3,899 |
| Income tax paid | -6,013 | -1,707 |
| WHT recovered | -112 | 0 |
| Current income tax expense | 19,239 | 2,834 |
| At 30 September / 31 December | 21,560 | 5,025 |

- d The income tax is calculated in line with Company Income Tax Act (CITA 2004 as amended) and in line with the Finance Act 2023.
- e The Nigerian Police Trust Fund Act (PTFA) 2019, stipulates that operating business in Nigeria to contribute 0.005% of their net profit to Police Trust Fund. In line with the Act, the Bank has provided for Police Trust Fund at the specified rate and recognised it as part of income tax for the period
- f The National Information Technology Agency Act (NITDA) 2007, stipulates that specified companies contribute 1% of their profit before tax to National Information
 Development Agency. In line with the Act, the Bank has provided for Information technology levy at the specified rate and recognised it as part of income tax for the period.
- g Tertiary Education Tax (TET) as amended by Finance Act 2023, stipulates that 3% of assessable profit of bank shall be contributed to funding of tertiary educational institutions in Nigeria. A specified rate has been provided as Tertiary Education Tax and recognised it as part of income tax for the period by the Bank. (2022: 2.5%)
- h National Agency for Science and Engineering Infrastructure Act (NASENI) stipulates that 0.25% of bank profit before tax should be contributed to funding the agency. The Bank has provided a specified rate for NASENI fund and recognised it as part of the income tax for the period.

17 Net reclassification adjustments for realised net gains

The net reclassification adjustments for realised net gains from other comprehensive income to profit or loss are in respect of debt instruments measured at fair value through other comprehensive income which matured during the year. See Other Comprehensive Income.

18 Earnings per share (EPS)

Basic earnings per share is calculated by dividing the net profit attributable to equity holders of the Bank by the weighted average number of ordinary shares in issue during the year. The diluted earnings per share is the same as basic EPS because there are no potential ordinary shares outstanding during the reporting period.

| | Q3 2023 | Q3 2022 30 | Sept 2023 3 | 0 Sept 2022 |
|------------------------------------------------------------------|------------|---------------|-------------|-------------|
| | N'million | N'million | N'million | N'million |
| Profit attributable to equity holders of the Bank (N'million) | 29,757 | 11,652 | 91,753 | 34,959 |
| Weighted average number of ordinary shares in issue (N'million) | 32,000 | 28,963 | 32,000 | 28,963 |
| Basic & diluted earnings per share (expressed in kobo per share) | 93 | 40 | 287 | 121 |

a Basic and diluted earnings per share are the same, as the Bank has no potentially dilutive ordinary shares.

19 Cash and Cash equivalents

| | | 30 Sept 2023 N'million | N'million | 31 December 2022 N'million |
|------|------------------------------------------------------------------|---------------------------|---------------------------|----------------------------------|
| | Cash | 26,638 | 25,908 | 33,300 |
| | Balances with central bank other than mandatory reserve deposits | 184,308 | 74,831 | 121,216 |
| | Due from banks | 357,762 | 216,026 | 145,829 |
| | Total cash and cash equivalents | 568,708 | 316,765 | 300,345 |
| 19.1 | Due from Banks | 30 Sept 2023 N'million | 30 Sept 2022 N'million | 31 December 2022 N'million |
| | Current accounts with foreign banks | 207.110 | 198,142 | 132,499 |
| | Current accounts with foreign outlines | 207,110 | 198,142 | 132,499 |
| | Placements with other banks and discount houses | 151,035 | 18,169 | 13,601 |
| | • | | , | . , |
| | Placements with other banks and discount houses | 151,035 | 18,169 | 13,601 |

Cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash on hand, deposits held at call with other banks and other short-term highly liquid investments with original maturities of less than three months. See Note 44

20 Restricted balances with central bank

| | 30 Sept 2023 3 | 30 Sept 2022 | 31 December 2022 |
|--------------------------------------------------------------------|----------------|--------------|---------------------|
| | N'million | N'million | N'million |
| Mandatory reserve deposits with central bank (see note 20.1 below) | 744,316 | 490,242 | 614,534 |
| Special cash reserve (see note 20.2 below) | 239,098 | 251,453 | 248,556 |
| Carrying amount | 983,414 | 741,695 | 863,090 |

20.1 Mandatory reserve deposits are not available for use in the Bank's day-to-day operations. It represents a percentage of the Customers' deposits and are non interest-bearing. The amount, which is based on qualified assets, is determined by the Central Bank of Nigeria from time to time. For the purpose of statement of cash flows, these balances are excluded from the cash and cash equivalents.

20.2 Special cash reserve represents special Intervention funds held with Central Bank of Nigeria as a regulatory requirement.

21 Impairment Allowance for Due from Banks

The table below shows the credit quality and the maximum exposure to credit risk based on the external credit rating system and year-end stage classification. The amounts presented are gross of impairment allowances. Details of the external rating system are explained in Note 3.2.2 and policies about whether ECL allowances are calculated on an individual or collective basis are set out in Note 3.2.1.

| | | | 30 September 2023 | |
|---------------------------|-----------------------|-----------------------|-------------------|-----------|
| | Stage 1 individual | Stage 2 Individual | Stage 3 | Total |
| | N'million | N'million | N'million | N'million |

The contractual amount outstanding on loans that have been written off, but were still subject to enforcement activity was nil at 30 September 2023 (31 December 2022: nil). The increase in ECLs of the portfolio was driven by an increase in the gross size of the portfolio and movements between stages as a result of increase in credit risk and changes in economic conditions. Further analysis of economic factors is outlined in Note 3.

22.1.2 Loans to individuals

The table below shows the credit rating of loans to individuals and the maximum exposure to credit risk based on the Bank's internal credit rating system and year-end stage classification. The amounts presented are gross of impairment allowances. Details of the Bank's internal grading system are explained in Note 3.2.2 and policies on whether ECL allowances are calculated on an individual or collective basis are set out in Note 3.2.1.

| At 31 December 2022 | 511 | 81 | 4,753 | - | 5,345 | |

The increase in ECLs of the portfolio was driven by an increase in the gross size of the portfolio and movements between stages as a result of increases in credit risk and a deterioration in economic conditions. Further analysis of economic factors is outlined in Note 3.

22.1 Advances under finance lease may be analysed as follows:

| | 30 Sept 2023 | 30 Sept 2022 | 31 December 2022 |
|--------------------------------------------------|-----------------|-----------------|---------------------|
| Gross investment | N'million | N'million | N'million |
| - No later than 1 year | 1,243 | 10,531 | 6,621 |
| - Later than 1 year and no later than 5 years | 8,952 | 12,359 | 11,448 |
| - Later than 5 years | 0 | 139 | 133 |
| Less: | 10,195 | 23,029 | 18,202 |
| Allowance for ECL/impairment losses | -23 | 0 | 0 |
| Unearned future finance income on finance leases | 46 | -7,808 | -70 |
| Net investment | 10,218 | 15,221 | 18,132 |
| The net investment may be analysed as follows: | | | |
| - No later than 1 year | 1,242 | 9,599 | 6,616 |
| - Later than 1 year and no later than 5 years | 8,976 | 5,483 | 11,382 |
| - Later than 5 years | 0 | 139 | 134 |
| | 10,218 | 15,221 | 18,132 |

22.2 Nature of security in respect of loans and advances:

| | 30 Sept | 30 Sept | 31 December |
|---------------------------------------|-----------|-----------|-------------|
| | 2023 | 2022 | 2022 |
| | N'million | N'million | N'million |
| Secured against real estate | 182,573 | 406,072 | 502,967 |
| Secured by shares of quoted companies | 0 | 0 | 0 |
| Secured others | 2,464,289 | 1,375,381 | 1,640,770 |
| Advances under finance lease | 38,171 | 49,076 | 42,954 |
| Unsecured | 79,755 | 236,929 | 10,069 |
| Gross loans and advances to customers | 2,764,788 | 2,067,458 | 2,196,760 |

23 Derivative Financial Instruments

The Bank entered into derivative contracts with counter parties; Total Return Swap with Standard Chartered Bank ("SCB"), Mashreq Bank and Non-deliverable Forwards with the Central Bank of Nigeria ("CBN"). The table below shows the fair values of derivative financial instruments recorded as assets or liabilities together with their notional amounts. The notional amount, recorded gross, is the quantity of the derivative contracts' underlying instrument (being foreign currency and treasury bills). The notional amounts indicate the volume of transactions outstanding at the year end and are not indicated verient the market or credit risk.

| 23a Derivative financial Assets | 30 Sept 2023 | 30 Sept 2022 | 31 December 2022 |
|-----------------------------------|-----------------|-----------------|---------------------|
| | N'million | N'million | N'million |
| Total return swap contracts | 34,854 | 215 | 4,363 |
| Non-deliverable forwards - | 0 | 0 | 415 |
| Futures Contracts | 0 | 0 | 0 |
| Total derivative financial Assets | 34,854 | 215 | 4,778 |

| 23b | Derivative financial liabilities | 30 Sept 2023 N'million | 30 Sept 2022 N'million | 31 December 2022 N'million |
|-----|----------------------------------------|------------------------------|------------------------------|----------------------------------|
| | Total return swap contracts | 24,697 | 305 | 1,208 |
| | Non-deliverable forwards | 0 | 0 | 0 |
| | Futures Contracts | 0 | 0 | 0 |
| | Total derivative financial Liabilities | 24,697 | 305 | 1,208 |

- i The Bank enters into currency forward contracts with counter parties. On initial recognition, the Bank estimates the fair value of derivatives transacted with the counter parties in line with IFRS 13. In many cases, all significant inputs into the valuation techniques are wholly observable (e.g. with reference to similar transactions in the dealer market.) See note 2.4.2 c
- ii During the period, various derivative contracts entered into by the Bank generated a net loss which was recognized in the statement of profit or loss and other comprehensive income, while additional liability was recognized for the liabilities.
- iii All derivative contracts are current

| Reconciliation of allowance for impairment | | | |
| At beginning of period | -830 | -824 | -729 |
| additional allowance for impairment | -778 | 1 | -101 |
| At end of period | (1,608) | (823) | (830) |
| | | | |
| Total investments | 794,728 | 599,327 | 537,884 |

24.5 Pledged Assets

The assets pledged as collateral were given to the counter parties without transferring the ownership to them. These are held by the counter party for the term of the transaction being collateralized.

Treasury Bills and Bonds are pledged to the Nigerian Inter Bank Settlement System Company Plc (NIBSS) in respect of the Bank's ongoing participation in the Nigerian settlement system. The Bank pledged Treasury bills and Bonds in its capacity as collection bank for government taxes and Interswitch electronic card transactions. The Bank also pledged Federal Government bonds in foreign currency to Standard Chartered Bank ("SCB") in respect of its short term borrowings.

The nature and carrying amounts of the assets pledged as collaterals are as follows:

| | 30 Sept 2023 N'million | 30 Sept 2022 N'million | 31 December 2022 N'million |
|-------------------------------------------|------------------------------|------------------------------|----------------------------------|
| Treasury bills - Amortised cost | 33,916 | 46,115 | 40,411 |
| Federal Government bonds - Amortised cost | 109,980 | 25,264 | 107,889 |

24.6 Impairment losses on financial investments subject to impairment assessment

24.6.1 Debt Instruments Measured at FVOCI

The table below shows the fair value of the Bank's debt instruments measured at FVOCI by credit risk, based on the Bank's internal credit rating system and Period-end stage classification. Details of the Bank's internal grading system are explained in Note 3.2.2 and policies on whether ECL allowances are calculated on an individual or collective basis are set out in Note 3.2.1:

| | | 30 September 2023 | | - |
|---------------------------|-------------------------|-------------------------|-----------|-----------|
| | Stage 1 Collectively | Stage 2 Collectively | Stage 3 | Total |
| Internal rating grade | N'million | N'million | N'million | N'million |
| Performing | | | | |

a Work in progress relates to capital cost incured in setting up new branches. When completed and available for use, they are transferred to the respective property, plant and equipment classes and depreciation commences.

b All property and equipment are non-current. None of the Bank's assets were financed from borrowings, consequently no borrowing cost has been capitalized as part of asset cost.

 $c \ \, \text{There were no impairment losses on any class of property , plant and equipment during the period (31 December 2022: Nil)}$

 $[\]boldsymbol{d} \ \text{There were no pledged assets in any class of property, plant and equipment during the period (31 December 2022: Nil)}$

These relate to purchased softwares. All intangible assets are non-current with finite useful life and are amortised over the period . The amortisation of intangible asset recognised in depreciation and amortisation in profit or loss was N1,210bn for the period ended 30 September 2023 (31 December 2022: N2,191bn).

28 Deferred Taxation

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority.

 $Deferred \ taxes \ are \ calculated \ on \ all \ temporary \ differences \ under \ the \ liability \ method \ using \ a \ statutory \ tax \ rate \ of \ 30\% \ or \ 32.5\% \ as \ applicable \ (2022:1000) \ and \$

Deferred tax assets and liabilities are attributable to the following items:

28.1 Deferred Tax Assets

- 31.1 Customer deposits for letters of credit relates to liabilities generated from loans granted to customers for trade finance transactions, it mirrors the value of the confirmation line enjoyed by the customer with the offshore bank for the purpose of facilitating the letters of Credit.
- 31.2 Account payable represents balances in internal accounts drawn for the purpose of settlement of obligations which are due against the bank either from bank expense or customer transaction settlement e.g. accrual/provision for expenses that has or will fall due, Ebanking settlement values drawn from customers account, customers deposit drawn for FX bid with CBN for letters of credit etc.

31.3 FGN Intervention Fund (On Lending facilities) 30 Sept 30 Sept 31 December 2023 2022 2022 N'million N'million N'million CBN state bailout fund 79,824 83,530 82,065 Real Sector Support Facility - Differentiated Cash Reserves Requirement - (DCRR) 198,035 213,701 211.001 Real Sector Support Facility - (RSSF) 7,400 12,213 10,941 Commercial Agricuture Ccredit Scheme - (CACS) 6.807 14.513 8.089 Bank of Industry BG backed 110,897 82,289 80,981 Bank of Industry - Restructured and Refinance scheme 223 322 297 Bank of Industry on lending 110 67 Develoment Bank of Nigeria - (DBN) 35,069 26,001 40,015 Nigeria Export Import Bank - (NEXIM) 18,507 20,781 19,613 Power Airline Intervention Fund - (PAIF) 2,342 4,381 3,871 CBN Paddy Agegate Scheme (PAS) Funds 1.250 0 5,000 Accelerated Agiculture Credit Scheme - (AADS) 0 0 CBN 100 for 100 PPP - (Policy on Production and Productivity) 6,288 11.744 11,644 Nigerian Incentive-based Risk Sharing system for Agricultural Lending - (NIRSAL) 17 17 19 466,658 469,603 473,603

- a FGN Intervention fund is CBN Bailout Fund of N79.82billion (31 Dec 2022: N82.07 billion). This represents funds for states in the Federation that are having challenges in meeting up with their domestic obligation including payment of salaries. The loan was routed through the Bank for onlending to the states. The Bailout fund is for a tenor of 20 years at 9% per annum. See Note 31.3 k
- b The Real Sector Support Facility (RSSF): The Central Bank of Nigeria, as part of the efforts to unlock the potential of the real sector to engender output growth, productivity and job creation has established a N300 billion Real Sector Support Facility (RSSF). The facility is disbursed to large enterprises and startups with financing needs of N500 million up to a maximum of N10.0 billion. The activities targeted by the Facility are manufacturing, agricultural value chain and selected service sub-sectors. The funds are received from the CBN at 2% per annum, and disbursed at 9% per annum to the beneficiary.
- c The fund received under the Central Bank of Nigeria (CBN) Commercial Agriculture Credit Scheme represents a credit line granted to the Bank for the purpose of providing concessionary funding to the agricultural sector. The facility attracts an interest rate of 2% per annum and the Bank is under obligation to on-lend to customers at an all-in interest rate of not more than 9% per annum. Based on the structure of the facility, the Bank assumes the default risk of all amounts lent to the Bank's customers. This facility is not secured.
- d The Central Bank of Nigeria (CBN) / Bank of Industry (B0I) SME / Manufacturing Intervention Fund represents an intervention credit granted to the Bank for the purpose of refinancing / restructuring existing loans to Small and Medium Scale Enterprises (SMEs) and Manufacturing Companies. The total facility is secured by Nigerian Government Securities. A management fee of 1% per annum is deductible at source and the Bank is under obligation to on-lend to customers at an all-In interest rate of 7% per annum. The Bank is the primary obligor to CBN / BOI and assumes the risk of default.
- e Federal Government through CBN, BOI and DBN to enable DMOs avail loans at single digit rates or rates lower than the normal commercial rate to qualifying institutions in line with the guidelines provided by CBN, BOI and DBN.
- f Non-oil Export Stimulation Facility (NESF): This Facility was established by the Central Bank of Nigeria to diversify the economy away from the oil sector, after the fall in crude prices. The Central Bank invested NS00billion debenture, issued by Nigerian Export-Import Bank (NEXIM). The facility disbursed per customer shall not exceed 70% of total cost of project, or subject to a maximum of N5 billion. Funds disbursed to the Bank from CBN are at a cost of 2% which are then disbursed to qualifying customers at the rate of 9% per annum.
- g The purpose of granting new loans and refinancing / restructuring existing loans to companies in the power and aviation industries is to support Federal Government's focus on the sectors. The facility is secured by Irrevocable Standing Payment Order (ISPO). The maximum tenor for term loans under the programme is 15 years while the tenor for working capital is one year, with option to renew the facility annually subject to a maximum tenor of five years. The facility attracts an interest rate of 2% per annum payable quarterly in arrears and the Bank is under obligation to on-lend to customers at an all-in interest rate of 9% per annum. This facility is not secured.
- h Accelerated Agricultural Development Scheme (AADS) was established by the Central Bank of Nigeria to help states develop at least 2 crops/agricultural commodities in which they have comparative advantage. The fund is disbursed to the Bank at 2% per annum. Each state is availed the facility at 9% per annum and repayments are made via ISPO deductions.
- i CBN PAS FUND The Paddy Aggregation Scheme (PAS) is for Integrated Rice Millers and Large-Scale Aggregators to enable them to purchase home-grown rice paddy at a single digit interest rate to promote the Federal Government of Nigeria's National Food Security Programme (NFSP). It is to provide credit facilities to Integrated Rice Millers and Large-scale rice paddy aggregators at single digit interest rate to increase local production of rice towards effecting lower prices and enhancing national food security. The fund is disbursed to the Bank at 6% per annum. Each enterprise is availed the facility at 9% per annum and repayments are made via ISPO deductions.
- j CBN 100 for 100 PPP (Policy on Production and Productivity) was established by the Central Bank of Nigeria to stimulate investments in Nigeria's manufacturing sector with the core objective of boosting production and productivity necessary to transform and catalyse the productive base of the economy. The fund is disbursed to the Bank at 2% per annum. Each enterprise is availed the facility at 9% per annum and repayments are made via ISPO deductions
- k The Bailout fund is for a tenor of 20 years at 7% per annum and availed for the same tenor at 9% per annum until March 2020, the rate was reduced to 5% for 1 year period due to Covid 19 pandemic to March 2021 after which it was extended to February 2023. CBN on August 17 2022 further reviewed the rates in response to economic outlook and approved the following order; All intervention facilities granted effective July 20, 2022 shall be at 9% per annum while all existing intervention facilities granted prior to July 20, 2022 shall be at 9% per annum effective September 1, 2022.
- 1 The bank carries out modification test on all Intervention funds / loans . The modification test was performed and there was no material impact on the financial statement from the assessment.
- ${\bf 31.4} \quad \text{Payable on E-banking transactions are settlement balances for RTGS/NIBSS transaction and Etransact transactions} \; .$
- 31.5 Other liabilities/credit balances are credit balances for other liabilities, other than the ones relating to customers deposit.
- 31.6 A provision has been recognised in respect of staff year end bonus, the provision has been recognised based on the fact that there is a constructive and legal obligation on the part of the Bank to pay bonus to staff where profit has been declared. The provision has been calculated as a percentage of the profit after tax.

35 Other Equity Accounts

The nature and purpose of the other equity accounts are as follows:

Share Premium

Premiums from the issue of shares are reported in share premium.

Retained Earnings

Retained earnings comprise the undistributed profits from previous years and current period, which have not been reclassified to the other reserves noted below.

35 Other Equity Accounts - Continued

Statutory Reserve

This represents regulatory appropriation to statutory reserve of 30% of profit after tax if the statutory reserve is less than paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid up share capital.

Small Scale Investment Reserve

The Small scale investment reserve is maintained to comply with the Central Bank of Nigeria (CBN) requirement that all licensed banks set aside a portion of the profit after tax in a fund to be used to finance equity investment in qualifying small scale industries.

Non-Distributable Regulatory Reserve

The amount at which the loan loss provision under IFRS is less than the loan loss provision under prudential guideline is booked to a non-distributable regulatory risk reserve.

Fair Value Reserves

The fair value reserve includes the net cumulative change in the fair value of financial assets measured at fair value through other comprehensive income until the investment is derecognised or impaired.

AGSMEIS Reserve

Agri-Business/Small and Medium Enterprises Investment Scheme (AGSMEIS); AGSMEIS fund is maintained to support the Federal Government's effort at promoting Agricultural businesses and Small and Medium Enterprises. Effective 2017 all Deposit Money Banks (DMBs) are required to set aside 5% of their Profit After Tax for equity investment in permissible activities as stipulated in the scheme guidelines. The fund is domiciled with CPN
